

Chiropractic Fellowship

Department of Neurosurgery

About our Doctor of Chiropractic Fellowship

The mission of the Medical College of Wisconsin Doctor of Chiropractic Fellowship (DCFP) is to provide DC fellows with an educational pathway that integrates evidence-based didactics with the cultivation of clinical and professional skills acquisition through clinical care experiences, inter-professional education, and scholarship.

Benefits of our program

CLINICAL

- Designed to provide fellows with advanced training as a spine and musculoskeletal focused member of a multi-disciplinary healthcare team.
- Fellows engage directly in a wide variety of patient care experiences beginning under the supervision of attending chiropractors, with increasing autonomy as they progress through the program.
- Fellows observe a wide variety of spine care procedures, from ambulatory settings to directly in the operating room.

ACADEMIC

- Fellows will engage in multiple scholarly related activities to enhance competency in evidence-based practice, critical thinking, and critical appraisal. Activities may include grand rounds, didactic lectures, clinical workshops and other training opportunities.

*Applicants must graduate with a Doctor of Chiropractic degree by June 1, 2025, and must apply for their license by the start of their fellowship.
