Section 1: General Information

Welcome from the Dean

The Medical College of Wisconsin's (MCW) School of Graduate Studies is dedicated to providing a rich and stimulating educational environment with a focus on supporting learners who engage in research. Through state-of-the-art education and world-class research and discovery, we are committed to providing an educational experience that is unique to each learner, with a variety of programs ranging from public and community health to the biomedical sciences.

Our graduate school experience is enhanced by participation of renowned faculty, committed not only to their specific areas of cutting-edge research, but also to mentoring the next generation of researchers, scientists, educators, and health leaders.

MCW's School of Graduate Studies offers over 40 degree-granting programs. These include doctoral programs, post-baccalaureate master's programs, and graduate certificate programs to serve the needs of learners in all stages of their career development. Our student-to-faculty ratio ensures exceptional individual attention, providing structured support that empowers students to emerge as leaders in their chosen fields. Moreover, to complement the educational experience, the Graduate School creates an inclusive environment and provides many services to best support our diverse learners during their professional development.

I encourage you to take full advantage of the opportunities available to you, both within and beyond the classroom and research spaces. Engage in meaningful discussions to foster collaboration and nurture your curiosity. Network and create friendships that will hopefully last a lifetime. Our dedicated faculty and staff are here to guide and mentor you every step of the way.

As you embark on this journey, I invite you to embrace the challenges and discoveries that lie ahead with enthusiasm, perseverance, and determination. Your contributions to our academic community are invaluable, and I look forward to celebrating your successes and accomplishments.

Daisy Sahoo, PhD

Dean of the School of Graduate Studies

School of Graduate Studies Mission Statement

The mission of MCW's School of Graduate Studies is to provide world-class research and training opportunities for students in the biomedical and health related sciences environment, which cultivates and integrates basic science and clinically oriented research, applied learning and community.

Graduate School Oath

I do hereby promise: to conduct myself in a manner deserving of inclusion; in the community of scholars that I join today; by fostering collegiality, and engagement. I will disavow prejudice, never allowing financial gain, competition, or ambition to cloud my judgement in the ethical conduct of my craft; i will act with honesty, integrity, and objectivity, in the pursuit of constructive knowledge that furthers my discipline and benefits society as a whole; finally, I will honor the foundation of knowledge that has come before me, and the promise of new discoveries to come.

Statements of Purpose

- Approve and supervise quality graduate educational programs consistent with freedom of inquiry and student welfare.
- Recruit and retain excellent graduate students, including minority students, from a large pool of candidates.
- Financially support graduate students competitively with other institutions.
- Provide access of students to highly skilled faculty in adequately-staffed graduate programs.
- Make supportive academic counseling and research mentoring available to students.
- Finish course and laboratory work in the biomedical sciences that yield a productive graduate educational experience.
- Ensure engagement of students in a high-quality research program under the supervision of a mentor and committee of graduate faculty.
- Assess student performance according to defined criteria and standards
- Facilitate offers of rewarding postdoctoral and employment positions of graduates.
- In all activities, ensure freedom of inquiry and equity of resource access for all graduate students and members of the graduate faculty.

Handbook Policy

Purpose

The Medical College of Wisconsin (MCW) strives for excellence in the services we provide and in the way we provide them. MCW is dedicated to meeting the highest standards as we serve our patients and conduct research, education, and business activities.

To help us meet and maintain these standards, we have established the School of Graduate Studies Handbook. This Handbook will help ensure that high standards are upheld across the Graduate School of MCW.

The Handbook contains policies and procedures that promote effectiveness, professionalism and safety. The purpose of the Handbook is to inform Graduate students of the policies and procedures that govern Graduate Student education within the Graduate School.

Policy

Research and education require the highest standards of professionalism and integrity from faculty and students. As a condition of matriculation, each graduate student is required to acknowledge receipt of the Graduate School Handbook.

Procedure

Each graduate student will be provided access to an electronic version of the School of Graduate Studies Handbook before matriculation into their educational program. Components of the handbook will be discussed with students during orientation.

(Corporate Compliance Policy ED.GS.020. Reviewed 08/15/2023.)

Academic Calendar

The [academic](#) calendars are published by the Office of the Registrar in consultation with the Academic Calendar Committee.

Terms

The Graduate School offers three terms each academic year: fall (mid-August to mid-December), spring (early January to mid-May) and summer (mid-May to mid-August).

Accreditation

The Medical College of Wisconsin has received accreditation from the Higher Learning Commission (HLC) for graduate and professional studies.

The Master of Science in Genetic Counseling program is accredited by the [Accreditation Council for Genetic Counseling \(ACGC\)](#).

The Doctor of Public Health Master of Public Health programs are individually accredited by the [Council on Education for Public Health \(CEPH\)](#). The Council on Education for Public Health (CEPH) is an independent agency which accredits schools of public health and public health programs offered in settings other than schools of public health.

Faculty and Staff

A complete listing of faculty can be found [here](#).

List of Programs

Certificate Programs

- [Clinical Bioethics](#)
- [Clinical and Translational Science](#)
- [Community Health Assessment and Planning](#)
- [Neuroethics](#)
- [Population Health Management](#)
- [Precision Medicine](#)
- [Public Health](#)
- [Regulatory Science for Facilitating Ethical Research](#)

Master's Programs

- [Bioethics \(MA\)](#)
- [Bioinformatics \(MS, joint degree with Marquette University\)](#)
- [Biomedical Engineering \(MS, joint degree with Marquette University\)](#)
- [Biomedical Engineering \(ME, joint degree with Marquette University\)](#)
- [Biostatistics and Data Sciences \(MA\)](#)
- [Clinical and Translational Science \(MS\)](#)
- [Genetic Counseling \(MS\)](#)
- [Global Health \(MS\)](#)
- [Healthcare Technologies Management \(MS, joint degree with Marquette University\)](#)
- [Medical Physiology \(MMP\)](#)
- [Public Health \(MPH\)](#)
- [Precision Medicine \(MS\)](#)

Doctoral Programs

- [Biochemistry \(PhD\)](#)
- [Biomedical Engineering \(PhD, joint degree with Marquette University\)](#)
- [Biophysics \(PhD\)](#)
- [Biostatistics \(PhD\)](#)
- [Cell and Developmental Biology \(PhD\)](#)
- [Interdisciplinary Biomedical Sciences](#)
- [Microbiology and Immunology \(PhD\)](#)
- [Neuroscience Doctoral Program](#)
- [Pharmacology and Toxicology \(PhD\)](#)
- [Physiology \(PhD\)](#)
- [Public Health \(DrPH\)](#)
- [Public and Community Health \(PhD\)](#)

Terminology

Academic Degree - a qualification awarded to a student upon successful completion of a course of study in higher education, usually at a college or university

BME – Biomedical Engineering

BSB – Basic Science Building

Dissertation – an extensive piece of writing that uses research to bring to light an original idea; typically, in order to receive a Doctoral degree

GSA – Graduate Student Association

GSC – Graduate Student Council

HRC – Health Research Center

HUB – Hub for Collaborative Medicine

IDP – Interdisciplinary Program in Biomedical Sciences

MCW – Medical College of Wisconsin

MEB – Medical Education Building

Mentor - a positive role model of a successful student who supports their mentee by giving academic advice, sharing resources, and caring about their students' success

MMP – Master of Medical Physiology

NDP – Neuroscience Doctoral Program

Professional Degree - a degree that prepares someone to work in a particular profession, practice, or industry sector often meeting the academic requirements for licensure or accreditation

SLC – Student Leadership Collective

TBRC – Translational and Biomedical Research Center

Thesis - scientific research that represents original research and is generally the final requirement for a Master degree

Section 2: Student Government and Student Services

Student Organizations

Graduate Student Association (GSA)

The [GSA symbolizes the entire graduate student body](#) through elected representatives from each graduate student programs. Their representative committee also includes two faculty mentors, one elected and one assigned, as well as representation from the Graduate School. The main goal of the GSA is to defend the overall interests, needs, and concerns of all graduate students.

The GSA organizes and co-sponsors events that they believe would be a benefit to current graduate students. The representative council meets monthly to share institutional committee and program updates, plan events, manage its budget that stems from student fees, and to address any emergent issues. Any graduate student at MCW is invited to attend monthly meetings, as well as get involved with the many committees.

Travel Awards

Purpose

The Graduate Student Conference Education Fund (Travel Fund) is available to help defray the costs of degree-seeking students attending a regional, national, international, or virtual scientific meeting. The fund is intended to give students an opportunity to present their research before a scientific audience, obtain helpful feedback for future progress, and network with other scientists. The pool of money comes from yearly contributions from the Friends of MCW, the Graduate Student Association (GSA), and annual GSA fundraising.

Governance

The Travel Fund procedures and student eligibility are determined by the GSA Representative Council (GRC) in consultation with departmental administrators, the Graduate School, and other faculty advisors. [For full information, the document is located in the Graduate Student Association policies and procedures.](#)

Kay Award

This [award](#) was created in memory of Kayoko “Kay” Ishizuka, a 2010 graduate from the Biochemistry department at the Medical College of Wisconsin. Kay, a citizen of Japan, was the GSA Biochemistry department representative for several years while she earned her PhD. She then began her postdoctoral research at the University of South Florida. Unfortunately, Kay was the victim of a fatal hit and run accident one night after leaving the lab. In recognition of her participation on the GSA, this award will be available to all current graduate students who have earned the opportunity to travel to and present at an international conference. An international conference is defined as a conference held and located outside the continental United States.

Guy Berst Award

[Guy Berst](#) worked at MCW for 15 years as Associate Director of Recruitment and Marketing. Guy was a strong advocate for all students and thoroughly enjoyed watching students’ careers flourish into lifelong scientific careers. Guy loved listening to student’s research projects and how their training was progressing. In memory of Guy’s support and advocacy, the GSA will sponsor a training award (\$500) to support students’ travels to furthering their scientific training. This can take the form of a scientific workshop and/or travel to another lab to learn and improve a new technique.

Paper of the Season

The Graduate School offers a [Paper of the Season award](#). This award is granted to an outstanding original research manuscript. The Awards Committee of the Graduate Studies Council (GSC) reviews all of the applications submitted to determine if all criteria has been met, and then scores and votes on a winning paper. Awards are granted 4 times per year – 1 for every season. Those who win receive a monetary award.

Student Leadership Collective (SLC)

Purpose

To unify the student government structure at the Medical College of Wisconsin in order to provide equal representation among the three schools and three campuses, and to facilitate room for growth as MCW continues to expand. The Student Leadership Collective serves as the voice of the entire MCW student body and contributes to institutional programming and decision making as appropriate.

Affiliations: Existing student government entities for each school will run independently from the SLC, though relevant collaborations, engagement, and consistent lines of communication are encouraged.

Goals

The focus areas of the SLC are around community building, service outreach, and advocating for students’ needs on campus. The students have faculty and staff mentors and meet semi-regularly in order to receive input, advice, and guidance in running their organization. Goals include:

1. Providing information to students about MCW services, resources, initiatives, decisions, and topics of interest.
2. Provide opportunities for student participation in MCW decision-making processes regarding matters which impact the student body.
3. Encourage participation in community building and service outreach opportunities.

Membership

Any student enrolled and in good standing in a formal degree granting program at MCW is eligible for active membership in the SLC. Standing standards to be determined and reviewed by each school

Institutional Student Services

Academic Support and Enrichment Services

The [Office of Academic Support and Enrichment](#) is dedicated to enhancing students' academic performance and wellbeing, promoting student excellence, and advancing medical students' career goals. The professionals of this office serve as student advocates, working with individual students to identify and resolve academic or personal issues and problems that may be negatively affecting a student's academic performance, personal health and/or quality of life. In addition, this office advises students on matters of academic standing and may make referrals to appropriate professionals.

Career Services

[MCW Career Services](#) provides individual career counseling, relevant career resources, workshops, and professional development programs to all MCW students. Career Services cultivates new and maintains existing campus and employer relations focused on career advancement and establish contacts to meet the career needs of students. There are services available to all MCW students and information specific to different schools and programs.

Financial Aid

The [Financial Aid Office](#) administers MCW's financial aid programs and provides guidance and resources regarding financial literacy. The Financial Aid Office is committed to helping students to better understand the financial aid process and make the financial decisions vital for each student to reach their educational, career, and personal goals.

Libraries

[MCW Libraries](#) provide a number of services to MCW faculty, students, and staff; Froedtert Hospital users; Children's Wisconsin users, and other users on the Milwaukee Regional Medical Center campus.

Registrar

In accordance with institutional policies and federal/state regulations, [the Office of the Registrar](#) maintains academic records as well as manages the academic calendar, course catalog, registration, and transcripts. The Office of the Registrar is ethical and professional in all that it does and assures the integrity of degree requirements and the grading process while maintaining confidentiality under the Family Educational Rights and Privacy Act. The Office of the Registrar embraces efficient practices and technology to improve the educational experience for all.

Student Accounts

The philosophy of the [Office of Student Accounts](#) is to provide courteous and professional service to students, parents, alumni and the entire MCW community during the billing and collecting of tuition. We assist with counseling students on their federal and MCW-based loans in compliance with terms and conditions and encourage the students to contact our office if they experience problems or concerns with their tuition or loans during their school years and beyond graduation.

Student Health Services

[Student Wellness](#) extends an invitation to all MCW students to reach out, seek out resources, and share your needs during this difficult time. Your concerns, requests, questions, and ideas are vital in providing appropriate resources and support. Thank you for your continued interest and actions to improve your personal health and wellbeing.

Student Inclusion and Diversity

The [Office of Student Inclusion and Diversity](#) is committed to supporting diversity of all types in medical education as well as recruiting and supporting students and residents who are Underrepresented in Medicine (URM).

Section 3: Academic Regulations

Accommodations

The Medical College of Wisconsin Graduate School collaborates with students, faculty and staff to ensure equal educational and programmatic access for eligible students with documented disabilities. We provide students the opportunity to reach their full potential by developing academic accommodations and support services along with promoting independence and self-advocacy for all students.

To be eligible for disability-related services, students must have a documented impairment as defined by Section 504 of the Rehabilitation Act (1973), the Americans with Disabilities Act (ADA, 1990) and the ADA Amendments Act (ADA-AA, 2008). The ADA regulations broadly define disability impairments to include a wide variety of disorders or conditions including: ADD/ADHD, Autism Spectrum Disorders, Medical/Health Conditions, Sensory Impairments, Learning Disabilities, Mobility/Physical Disabilities, and Psychological Disabilities.

Students requiring accommodations should submit this [form](#) along with documentation to the Director of Enrollment and Student Services at abackus@mcw.edu.

Academic Standing

At the conclusion of each term, the Academic Standing and Welfare committee (ASWC) shall be notified by the Graduate School concerning any student who has a cumulative grade point average less than 3.0, who has obtained a 'U' grade in a course graded on the proficiency scale or who has obtained an 'F*' grade in a course graded on the pass/fail scale. The ASWC will inform the student, the student's program director, and the student's mentor, of their academic standing as outlined in the Graduate School policy below and will require a statement from the student concerning their remediation plan. The ASWC has the authority to require a face-to-face meeting with a student placed on academic probation. If a student fails to comply with the requests of the ASWC their further registration will be in jeopardy.

Graduate School Academic Standing Policy

A student who does not maintain a cumulative grade point average of 3.0 or better, receives an 'unsatisfactory (U)' grade in any course that is graded on the proficiency scale will be placed on academic probation. Probationary status will not affect a student's stipend or benefit eligibility, if applicable.

A student on probation due to a low GPA has up to two enrolled terms to achieve grades sufficient to increase their cumulative GPA to 3.0 or better at the end of a term. A student will be removed from probationary status if their cumulative GPA reaches 3.0 or better at the end of a term. Failure to accomplish this will result in a recommendation for dismissal.

A student will be recommended for dismissal after only one term of probation if it is mathematically impossible for the student to achieve a cumulative GPA of 3.0 by taking courses approved by the program during a second term of probationary status.

A student on probation due to receiving an 'unsatisfactory (U)' grade has one enrolled term to achieve a passing grade. A student on probation due to an 'unsatisfactory' grade who obtains a second 'unsatisfactory' grade in any course will be recommended for dismissal. A student will be removed from probation if they obtain a 'satisfactory' or better grade in all such courses.

Under extenuating circumstances, the period of probationary status may be extended for one term if approved by the Dean of the Graduate School.

Except under extenuating circumstances, probationary status may only occur once during a student's academic career in the Graduate School. Under no circumstances will a degree or certificate be issued to anyone who does not obtain a 3.0 cumulative grade point average upon completion of their studies.

(Graduate Studies Council Approved June 21, 2024)

Dismissal from a Graduate School Program

Academic excellence in the classroom and in research, as well as continuing professional behavior, is required of all candidates for all Graduate School programs. If a student fails to meet these standards they may be recommended for dismissal from the Graduate School.

Recommendation for Dismissal

If a student is recommended for dismissal by the Academic Standing and Welfare Committee, program director, or other related academic leadership, the Dean of the Graduate School will assess the merits of the recommendation. This assessment may involve an investigation of the alleged infraction conducted by the Associate Dean of Academic Affairs. If the Dean decides to proceed with dismissal, the Dean will deliver a letter concerning the recommended dismissal to the student, personally, by email, or by registered or certified mail, with return or read receipt requested. The notice should include the following information:

1. A statement that dismissal is under consideration.
2. A summary of the basis upon which dismissal has been recommended.
3. An invitation to a dismissal hearing.

4. A notification of available options to the student including, all relevant policies regarding the appeals process.

Students have the opportunity to either respond to the recommendation of dismissal by requesting a hearing or accept the dismissal. If accepting the dismissal, it will be placed on the student's transcript and the student will officially be dismissed from the School of Graduate Studies. If the student chooses to request a hearing, please reference the "Dismissal Hearing" section below.

Dismissal Hearing

If the student responds in writing within ten business (10) days requesting a hearing regarding their recommendation of dismissal, the Dean will then advise the Academic Standing and Welfare Committee to conduct a hearing under the following conditions:

- a) The hearing should be held not less than five (5) nor more than fifteen (15) business days after receipt of the request by the student. An extension of time for the hearing should be authorized by the Dean only for compelling reasons.
- b) The student's academic file and all correspondence related to the proposed dismissal should be made available to the student in advance of the hearing.
- c) The student should be able to present any witnesses of their choosing and should have the right to confront witnesses against themselves, if any.
- d) If the student does not appear for the hearing (personally or through counsel) without a satisfactory explanation for the absence, or if the student leaves the hearing before its conclusion, the hearing should proceed without the student, and a decision should be rendered based on the available evidence.
- e) The Committee should maintain an orderly hearing and permit no person to be subjected to abusive treatment. The Committee may eject or exclude anyone who refuses to be orderly. The Committee may question witnesses. The Committee chair should rule on all questions of procedure or admissibility of evidence and the chair's ruling is conclusive.
- f) The hearing is not public and should be closed to everyone other than members of the Committee, the student being reviewed, appropriate legal advisors for each of them, the person designated to record the hearing, and witnesses, while they are presenting evidence.
- g) The Committee should make a recording and written summary of the hearing.
- h) Following presentation of evidence, all other participants will be asked to withdraw, and the Committee will privately consider the evidence and reach a decision. A majority vote of the Committee members is required for a binding decision. The Committee chair will advise the student, at the earliest opportunity, of the decision.

If the Committee finds that dismissal of the student is not warranted, the student will be notified.

In academic programs that include a significant research component, continuation in the program may require the continuous association of the student with a research mentor. It is possible that although the alleged violation does not rise to the level of dismissal, that the mentor/student relationship has been irrevocably fractured. In such cases the decision not to proceed with dismissal does not bind the academic program to provide an alternative mentor. In such cases the onus of finding a new mentor will be placed on the student, with appropriate assistance from Graduate School.

If the Committee finds that dismissal from the Graduate School is warranted, the Committee will promptly prepare a written report that contains:

1. A brief summary of the findings.
2. A statement that the facts demonstrate that the student has failed to meet the academic, research, or professional standards of the College.
3. A statement of the action that the Committee has decided and the effective date of that action.

A copy of the Committee's report should be promptly delivered to the Dean and to the student. Delivery may be made personally, by email, or by registered or certified mail. The decision of the Committee is final and binding, unless appealed by the student. The Dean will send an official dismissal letter following receipt of the Committee's report.

Students have the opportunity to either respond to the dismissal by requesting an appeal hearing or accept the dismissal. If accepting the dismissal, it will be placed on the student's transcript and the student will officially be dismissed from the School of Graduate Studies. If the student chooses to request an appeal, please reference the "Appeal of Dismissal" section below.

(Graduate Studies Council Approved June 21, 2024)

[Appeal of Dismissal Policy](#)

Appeal of Dismissal

A student may appeal the decision, of the Academic Standing and Welfare Committee (Academic Standing) or Ad-Hoc Committee (Professional Misconduct) and the Dean, to dismiss them from the College by giving notice, within ten (10) business days, in writing, of an intention to do so, specifying the grounds for the appeal. This notice must be delivered to the Graduate School Dean within ten (10) business days of the date on which the decision was made accessible to the student at a location specified by the student at the time of the hearing. A student who does not give such notice within ten (10) business days shall be deemed to have waived the right to appeal.

In the event of an appeal, the Dean will appoint, within five (5) business days of receipt of the notice of appeal, a subcommittee for the purpose of hearing the appeal of the student. The subcommittee will consist of five (5) members of the Graduate Studies Council. Members of the student's department or program and members of the Academic Standing and Welfare Committee are ineligible to serve on this subcommittee. An adequate number of alternate members will be designated to ensure that the hearing will be conducted by a full subcommittee.

The Ad-Hoc Appeals Subcommittee will set a date for hearing the appeal, which shall not be more than ten (10) business days after its appointment and shall give written notice of the time and place of the hearing to the student by personal delivery or by certified or registered mail.

At least three (3) business days prior to the appeal hearing, a written report giving the decision of the Academic Standing and Welfare Committee (Academic Standing) or the Ad-Hoc Committee (Professional Misconduct) and the summary of the hearing conducted by that Committee shall be delivered to the Appeals Subcommittee.

At least three (3) business days prior to the appeal hearing, the student, or their representative shall submit to the chair of the Appeals Subcommittee a written statement detailing the grounds on which the appeal is based.

The chair of the Appeals Subcommittee will distribute a copy of both these documents to members of the Subcommittee at least two (2) business days prior to the appeal hearing.

This Appeals Subcommittee will conduct the review hearing subject to the following:

1. In reviewing the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee, this Appeals Subcommittee will be confined to the decision of the Committee and the process whereby this decision was reached. Except as provided in paragraph "4" below, no new testimony will be taken. This Subcommittee may affirm the Academic Standing and Welfare Committee's decision, or may modify, or reverse it, if the substantial rights of the student have been prejudiced by reason of the Committee's decision being:
 - a. An unfair or incorrect application of the policies of the College concerning student performance
 - b. Arbitrary and capricious
2. Inconsequential irregularities in the deliberations procedure of the Academic Standing and Welfare Committee shall not be grounds for reversal of the Committee's decision. The test is whether the deliberations conformed to MCW guidelines, and whether the student's rights were compromised by such irregularity.
3. Hearings before this Appeals Subcommittee are not public. Members of the Appeals Subcommittee, the student, the student's advisor or counsel, a representative of the Academic Standing and Welfare Committee, and the person designated to record the hearing, if any, may be present. The hearing will be recorded upon the order of the chair of this Appeals Subcommittee.
4. The student and the student's legal counsel, and/or a single advocate may appeal for modification or reversal of the Committee's decision. A representative of the Committee, or its counsel, may appear and present a statement explaining the basis for the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee. Members of this Appeals Subcommittee may question those present on pertinent matters.
5. Following the presentations and questioning, all other participants shall privately consider the matter. A majority vote of the Subcommittee members present is required for a binding decision.
6. With reasonable promptness, a written report stating the conclusion and underlying reasons affirming or reversing or modifying the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee will be prepared. This Appeals Subcommittee shall state its conclusion and the underlying reasons therefore.
7. A copy of the decision shall be delivered, with reasonable promptness, to each of the following:
 - a. The student: in person, by email, or by certified or registered mail, return or read receipt requested;
 - b. The Academic Standing and Welfare Committee or the Ad-Hoc Committee
 - c. The School of Graduate Studies Dean
8. The decision of this Appeals Subcommittee shall be final and non-appealable.

(Graduate Studies Council Approved June 21, 2024)

Auditing

Current students have the ability to audit a course without earning credit. Students are allowed to change from credit to audit status during the add/drop period. Please consult the academic calendar for the specific deadline dates. Students are expected to discuss specific expectations with course directors prior to auditing a course. Those enrolled in a class that they are auditing are expected to attend courses based on the attendance policy written in the course syllabus. Students are not required to complete written course assignments or examinations. Those who are auditing a class but do not attend will have their registration in the course relinquished. Auditing students will receive a grade of AU for the course on their transcript. For more information on how to apply to audit a course, contact acadreg@mcw.edu.

Authorship on Publications

In cases a dispute of an original work, a student, research mentor, or any member of the faculty feels that a publication has resulted in improper recognition of the original contributions of a student to the research, and if the problem is not resolved at the department level, a written letter expressing concern should of be submitted to the Dean of the Graduate School, who will initiate a confidential review, using the process described in the MCW policy [Authorship on Scientific and Scholarly Publications](#).

(Corporate Compliance Policy RS.GN.090. Revised 10/01/2023)

Catalyst Bioconsulting

Since its inception, Catalyst Bioconsulting (CBC) has accepted applications only from postdocs. Due to the changing nature of academic training, CBC is now accepting applications from Medical College of Wisconsin (MCW) Graduate Students (GS).

GS will be considered trainee consultants and will be supervised by CBC consultants. GS will have the opportunity to shadow selected CBC consultants and learn via observation. This shadowing includes voluntarily participating in meetings with clients, and with the CBC team to whom the GS is assigned. The amount of time spent volunteering will be based on the student's schedule. Graduate School responsibilities will always take priority. GS will also have the opportunity to attend learning workshops held once per month.

At all times, the GS will ensure that their graduate schoolwork takes priority over all CBC activities.

Prerequisites

- a. GPA minimum: 3.5
- b. Successfully passage of qualifying exam
- c. Outline approved by the Dean of the Graduate School
- d. Must be in their 3rd or 4th year of training
- e. A 1-year time limit will be observed. GS must obtain their Advisor's approval (in writing). A form will be provided to do so. This form will also include a guarantee that the GS has obtained permission from all thesis committee members to join CBC.

Continuing Status

Continuing status is a form of registration that is available to students who have completed all of their required course work including thesis or dissertation credits but have not yet completed the writing of the thesis or dissertation. A student may be permitted to register for Master's Thesis Continuation or Doctoral Dissertation Continuation for a total of three terms. During this period, the student must complete their thesis or dissertation within the deadlines established by the School of Graduate Studies. While on continuing status, PhD students who have received stipends may continue to do so at the discretion of their academic program. PhD students remaining on a stipend will continue to receive health insurance through MCW.

Tuition scholarships remain in force for students on continuing status if they are receiving a stipend and enrollment will be considered full-time. All other continuing status students must make full payment at the time of registration and will be considered enrolled less than halftime.

Course Attendance

In-Person Course Attendance Policy

Students are expected to physically attend all required class sessions unless the course director or instructor has specified that attendance is not mandatory. Virtual attendance via recorded livestream is not considered appropriate unless specifically permitted by the course director or instructor. Specific requests should be discussed directly with the course director.

Students are responsible for all materials covered during any class absence. It is the student's responsibility to contact course directors if an extraordinary circumstance prevents them from attending a course, rotation, or mandatory session.

Attendance policies specific to examinations can be found in the Missed Exam Guidelines below.

Virtual Course Attendance Policy

Students are expected to virtually attend all required class sessions unless the course director or instructor has specified that attendance is not mandatory. Specific requests should be discussed directly with the course director.

Students are responsible for all materials covered during any class absence. It is the student's responsibility to contact course directors if an extraordinary circumstance prevents them from attending a course, rotation, or mandatory session.

Attendance policies specific to examinations can be found in the Missed Exam Guidelines below.

Religious Holidays

As a private, not-for-profit, non-sectarian organization, the Medical College of Wisconsin does not promote any religion. MCW does not discriminate against students, staff, or faculty based on religion or lack of religious belief.

MCW recognizes there may, on occasion, be conflicts between educational requirements and the private free exercise of religion. MCW is committed to reducing these conflicts; however, minimizing these conflicts must be accomplished without causing unreasonable interference with the delivery of

coursework. A student's claim of sincerely held religious beliefs will be taken at face value and information provided by a student about religious beliefs will be kept confidential to the extent possible.

MCW recognizes there are likely to be periodic conflicts between mandatory academic requirements and religious obligations. A student with a conflict between an academic requirement and a religious holy day may be offered an alternative means of meeting the academic requirement subject to the following:

1. A student who requests an alternative means of meeting an academic requirement due to religious practices must notify the course director of the specific dates that they are requesting the rescheduling of an academic requirement. The course director must be notified as soon as possible.
2. Course directors may set limits on the number of days requested by any one student.
3. Students remain responsible for coursework covered during any absence.
4. Course directors may schedule make-up exams or other mandatory work before or after the claimed religious day.
5. Course directors are permitted to make changes in the arrangements for make-up work.

If the course director believes the number of religious holidays requested by a student is unreasonable or that the conflict cannot be resolved without causing unreasonable interference with the delivery of the coursework or the course, the matter may be referred to the School of Graduate Studies, who shall discuss the matter with the course director, the involved department(s), and with the student, if necessary, and render a decision

Course Cancellations Due to Inclement Weather

On rare occasions, severe external conditions (such as inclement weather or other potentially hazardous or emergency situations) may require MCW to close or delay opening. Announcements pertaining to closures are coordinated through the Office of Communications and shared through the news media, email communications, InfoScope, and MCW's emergency text messaging service.

It is the general policy that MCW will maintain a normal operating schedule. A student should never assume that MCW will close, delay opening, or close early. MCW will open on its regular schedule with the expectation that students will report to class, regardless of the weather condition, unless otherwise officially announced by MCW.

Students are encouraged to make every effort, consistent with their own safety, to arrive to class as scheduled. A student is required to inform the course director by email if they are unable to report to class or anticipate arriving late due to adverse weather conditions or some other emergency.

Attendance policies specific to examinations can be found in the Missed Exam Guidelines below.

Degree Requirements

Doctor of Philosophy (PhD) Degree Requirements

Academic Standing

Students must remain in good academic standing, defined as at least a 3.0 grade point average in courses and an “SD” or better performance in proficiency courses to be eligible to take the PhD qualifying examination and, subsequently, be eligible for degree award.

Mentor

The mentor, a full-time MCW faculty and a member of the School of Graduate Studies faculty, is selected by mutual agreement between the student, the proposed mentor, the program director, and the department chair. For doctoral students the mentor must be on the list of approved mentors as established by the Faculty Credentials Committee of the Graduate Studies Council. Every effort is made to assist students in securing the area of research and mentor of choice. However, acceptance into a degree program does not commit the MCW Graduate School to find a mentor for the student. If no faculty member in the program is available or willing to serve as their mentor, the student may not be able to complete the academic program.

Advising students in a graduate program of study at MCW is initially the responsibility of the program director of the student's academic program. This program director is obligated to counsel students in planning for initial coursework and in exploring research opportunities with various members of the graduate faculty.

Within the first 18 months of graduate study, the student is expected to negotiate with a faculty member for participation in the faculty member's research program. This negotiation culminates in assumption by the faculty member of responsibility for continued advising, counseling and funding as the student's mentor.

Time Limit

Doctor of Philosophy degree candidates must complete all degree requirements within seven (7) calendar years. A minimum of sixty (60) credits of graduate work must be accumulated during the duration of the graduate program under the direct supervision of the student's mentor or program director.

Doctor of Philosophy degree candidates who enter a program of study at MCW with a MS degree or who earn the MS degree at MCW and wish to continue study toward the PhD degree must complete all requirements for the PhD degree within five (5) calendar years, unless the graduate program or department determines that the MS degree is in an unrelated field. In that case, the seven (7) year degree completion time interval will apply. In either case, the student must enroll for at least two (2) consecutive semesters of full-time study and accumulate a minimum of sixty (60) credits of graduate work during the duration of the doctoral program.

Preliminary Requirements

PhD Qualifying Exam

Satisfactory performance on the PhD qualifying examination is required. Information about the nature and time of the examination is available from the program director. Good academic standing is required to take the PhD qualifying exam. The examination has written and oral components, and surveys the student's depth of knowledge in the major field and in related scientific areas. The examination may be retaken one time if the initial performance is unsatisfactory. Faculty who serve as a chairperson for a student's qualifying examination need to complete a [Qualifying Examination Report](#). If the result is unsatisfactory, the [Unsatisfactory Examination Form](#) is required to be completed and submitted. The examination outcome(s) are forwarded to the School of Graduate Studies.

Committee

The Dissertation Committee is constituted when the student, with guidance and approval from the mentor, secures the consent of appropriate faculty (including the mentor) to serve on the Committee. When the Committee has been formed, the student is required to complete the [Committee Approval](#) form for final approval by the Dean of the Graduate School. Any changes that occur to the committee require a [Committee Change](#) form.

The Graduate School requires the following committee composition:

- Mentor (Committee Chair) must be an approved graduate school faculty member
- All members must have a terminal degree in their field
- For any members outside of MCW, you must submit a CV with this approval form
- Five (5) members
- Reference your program handbook for any additional program committee composition requirements

Dissertation Proposal Approval

The student and mentor should discuss potential areas of research and agree upon a reasonable hypothesis to be tested by the student. Previous research results that are relevant to the hypothesis and further experimental approaches to test the hypothesis should be discussed. These discussions will provide a basis for a [written proposal that describes the research project that the student will initially pursue for their dissertation research](#). It is understood and accepted by all concerned that this initial project may be modified significantly or abandoned as a consequence of future developments.

The purpose of the proposal is:

- To ensure that the student gains an understanding of the current status of research within their chosen area;
- To train the student in the scientific method;
- To ensure that both the student and mentor agree on a research project that has the potential to generate meaningful data.

Students writing a dissertation are required to submit an approved [Dissertation or Thesis Proposal Approval](#) to the Graduate School by the deadline set by the program and prior to initiation of the major portion of research. For PhD students, this deadline will occur no later than 18 months prior to the PhD dissertation defense date. Waiver request with the Associate Dean of Students is required if proposal was approved less than 18 months from the scheduled defense or 12 months for students admitted prior to Spring 2020.

(Graduate Studies Council 12/2003)

During the course of the student's research, it may be necessary to modify or change either the hypothesis to be tested or the Specific Aims. These changes should be discussed with the members of the student's Committee. In instances where the Committee determines that major modifications are recommended, the student should prepare a brief document that includes, as necessary, (1) the revised hypothesis to be tested, (2) modified or new Specific Aims, and (3) modified or new methods. This modified document does not need to be approved outside of the Committee, but will become a part of the student's permanent record in the Graduate School Office.

[Candidacy Advancement](#)

Upon recommendation of the mentor and program director, and upon receipt of the approved research proposal, the School of Graduate Studies, with approval of the Dean, will notify the student of advancement to candidacy for the PhD degree. Continuation of candidacy status is dependent upon continued satisfactory evaluation of the student by the mentor, program director, and the Dean of the Graduate School.

[Special Circumstances](#)

Under special circumstances, students may be given the option to complete with a master's degree with thesis instead of a PhD degree. Student must get program director, mentor, and Graduate School approval to change their program degree. In addition, the following master's degree requirements must be met: program core courses completed, minimum of 30 credits completed, cumulative 3.0 GPA or higher, in good academic standing in final term, 6 credits of master's thesis completed, and degree completion requirements completed as outlined on the [MS Degree Completion Checklist](#).

[Program Specific Requirements](#)

Programs may have additional requirements. Reference Program Handbook for details.

[Degree Completion](#)

Reference the [PhD Degree Completion Checklist](#).

[Application to Graduate](#)

A student nearing defense and degree completion is required to submit an application for graduation via MCWConnect according to these dates and deadlines. Please note: Joint degree PhD Biomedical Engineering students also need to apply at Marquette University.

[Application for Graduation Program Approval](#)

Prior to the start of a student's final term, completion of the application for graduation program approval is required to be submitted to the School of Graduate Studies.

[Dissertation Defense](#)

A dissertation defense is required, and should be scheduled by mutual agreement between the student, mentor, program director, department chair and the committee. For defense set-up, please reference the [PhD Dissertation Defense Guide](#).

[Defense Announcement](#)

The PhD Dissertation Defense Announcement is required to be prepared using the [PhD Dissertation Defense Announcement Template](#), and distributed one month prior to the date of the defense.

[Preliminary Dissertation](#)

A copy of the dissertation must be submitted to their Committee and School of Graduate Studies (gradcompletion@mcw.edu) two (2) weeks prior to the dissertation defense. [Reference the Dissertation Formatting Guide](#). For supplementary information, please refer to the [ProQuest guide](#).

[Approval & Submission](#)

All required documents, including the final dissertation, must be submitted to the School of Graduate Studies within two (2) weeks following the defense.

Committee & Program Director Final Recommendation

This form, [Committee & Program Director Final Recommendations](#), must be completed after the oral public defense and submitted by the degree completion due date.

Final Dissertation

Students are required to send a final PDF version of their dissertation to the Graduate School. [Reference the Dissertation Formatting Guide.](#)

Publishing & Binding

Final dissertations are published and bound through ProQuest. Please reference the [ProQuest publishing resources and guidelines.](#)

Survey of Earned Doctorates (SED)

Students are required to complete the Survey of Earned Doctorates (SED). The SED gathers information annually from approximately new research doctorate graduates from U.S. universities about their educational histories, funding sources, and post-doctoral plans.

Post Completion Contact Information Survey

Students are required to complete the post completion contact information survey. This survey will be provided by the School of Graduate Studies.

Photo for Commencement Book

Students are required to submit a professional photo for the Commencement Book.

PhD Dissertation Award

If a student wishes for their dissertation to be considered for the PhD dissertation awards, eligible applicants will be contacted early spring with deadlines and application requirements.

The awards are as follows:

- Outstanding Contribution to Advancing Health Equity Award
- Doctor of Philosophy Outstanding Dissertation Award

Special Circumstances

Extension of Degree Completion Requirements

By request of the mentor, the two-week deadline for degree completion after defense may be extended. To request an extension, student and/or mentor should email the Associate Dean of the Graduate School.

Continuing Student Status

Continuing in a paid “student” status beyond your degree completion due date is an option that needs to be discussed with your Program Department Administrator and Advisor. Graduate students can stay on in a paid “student” status up to 60 days after degree completion if funding is provided by the lab/department. This may not be applicable for international students

applying for OPT. Student Insurance is covered through the end of the month paid “student” status ends. Notify the Graduate School of new completion dates to ensure student insurance is extended. Note, this is not an extension of degree requirements, it is only an extension of stipend and health insurance.

[Program Specific Requirements](#)

Programs may have additional requirements. Reference Program Handbook for details.

Doctor of Public Health (DrPH) Degree Completion

[Academic Standing](#)

Students must remain in good academic standing, defined as at least a 3.0 grade point average in courses and an “SD” or better performance in proficiency courses to be eligible to take the PhD qualifying examination and, subsequently, be eligible for degree award.

[Mentor](#)

The mentor, a full-time MCW faculty and a member of the School of Graduate Studies faculty, is selected by mutual agreement between the student, the proposed mentor, the program director, and the department chair. For doctoral students the mentor must be on the list of approved mentors as established by the Faculty Credentials Committee of the Graduate Studies Council. Every effort is made to assist students in securing the area of research and mentor of choice. However, acceptance into a degree program does not commit the MCW Graduate School to find a mentor for the student. If no faculty member in the program is available or willing to serve as their mentor, the student may not be able to complete the academic program.

Advising students in a graduate program of study at MCW is initially the responsibility of the program director of the student’s academic program. This program director is obligated to counsel students in planning for initial coursework and in exploring research opportunities with various members of the graduate faculty.

[Time Limit](#)

Doctoral degree candidates must complete all degree requirements within five (5) calendar years. A minimum of forty-six (46) credits of graduate work must be accumulated during the duration of the graduate program under the direct supervision of the student’s mentor or program director.

[Preliminary Requirements](#)

[Committee](#)

The Dissertation Committee is constituted when the student, with guidance and approval from the mentor, secures the consent of appropriate faculty (including the mentor) to serve on the Committee. When the Committee has been formed, the student is required to complete the [Committee Approval](#) form for final approval by the Dean of the Graduate School. Any changes that occur to the committee require a [Committee Change](#) form.

The Graduate School requires the following committee composition:

- Mentor (Committee Chair) must be an approved graduate school faculty member
- All members must have a terminal degree in their field
- For any members outside of MCW, you must submit a CV with this approval form

- Three (3) members
- Reference your program handbook for any additional program committee composition requirements

[Dissertation Proposal Approval](#)

The student and mentor should discuss potential areas of research and agree upon a reasonable hypothesis to be tested by the student. Previous research results that are relevant to the hypothesis and further experimental approaches to test the hypothesis should be discussed. These discussions will provide a basis for a written proposal that describes the research project that the student will initially pursue for their dissertation research. It is understood and accepted by all concerned that this initial project may be modified significantly or abandoned as a consequence of future developments. Please contact the DrPH program for the program-specific dissertation guide.

The purpose of the proposal is:

- To ensure that the student gains an understanding of the current status of research within their chosen area;
- To train the student in the scientific method;
- To ensure that both the student and mentor agree on a research project that has the potential to generate meaningful data.

Students writing a dissertation are required to submit an approved [Dissertation or Thesis Proposal Approval](#) to the Graduate School by the deadline set by the program and prior to initiation of the major portion of research. For DrPH students, this deadline will occur no later than 9 months prior to the DrPH dissertation defense date. Waiver request with the Associate Dean of Students is required if proposal was approved less than 9 months from the scheduled defense.

[Candidacy Advancement](#)

Upon recommendation of the mentor and program director, and upon receipt of the approved research proposal, the School of Graduate Studies, with approval of the Dean, will notify the student of advancement to candidacy for the DrPH degree. Continuation of candidacy status is dependent upon continued satisfactory evaluation of the student by the mentor, program director, and the Dean of the Graduate School.

[Program Specific Requirements](#)

Programs may have additional requirements. Reference Program Handbook for details.

[Degree Completion](#)

Prior to the start of a student's final term, completion of the application for graduation program approval is required to be submitted to the School of Graduate Studies.

[Approval & Submission](#)

All required documents, including the final thesis, must be submitted to the School of Graduate Studies within two (2) weeks following the defense.

Degree Recommendation

This form, [Degree Recommendation](#), must be completed after the final program specific requirements have been met.

Final Paper

Students are required to send a final PDF version of their final paper to the Graduate School.

Post Completion Contact Information Survey

Students are required to complete the post completion contact information survey. This survey will be provided by the School of Graduate Studies.

Photo for Commencement Book

Students are required to submit a professional photo for the Commencement Book.

[Program Specific Requirements](#)

Programs may have additional requirements. Reference Program Handbook for details.

Master of Medical Physiology (MMP) Degree Completion.

[Academic Standing](#)

Students must remain in good academic standing, defined as at least a 3.0 grade point average in courses and an "SD" or better performance in proficiency courses to be eligible to take the PhD qualifying examination and, subsequently, be eligible for degree award.

[Time Limit](#)

Master of Medical Physiology degree candidates must complete all degree requirements within one (1) calendar year. During this time, the student must be enrolled in full-time study prescribed by the program. A minimum of thirty-two (32) credits of graduate work must be accumulated during the duration of the graduate program.

Degree Completion

Reference [MMP Degree Completion Checklist](#).

Application to Graduate

A student nearing degree completion is required to submit an application for graduation via MCWConnect according to these dates and deadlines.

Application for Graduation Program Approval

Prior to the start of a student's final term, completion of the application for graduation program approval is required to be submitted to the School of Graduate Studies.

Approval & Submission

All required documents must be submitted to the School of Graduate Studies within two (2) weeks following the defense.

Degree Recommendation

This form, [Degree Recommendation](#), must be completed after the final program specific requirements have been met.

Post Completion Contact Information Survey

Students are required to complete the post completion contact information survey. This survey will be provided by the School of Graduate Studies.

Photo for Commencement Book

Students are required to submit a professional photo for the Commencement Book.

Program Specific Requirements

Programs may have additional requirements. Reference Program Handbook for details.

Master of Public Health (MPH) Degree Completion

Academic Standing

Students must remain in good academic standing, defined as at least a 3.0 grade point average in courses and an "SD" or better performance in proficiency courses to be eligible to take the PhD qualifying examination and, subsequently, be eligible for degree award.

Time Limit

Master of Public Health degree candidates must complete all degree requirements within five (5) calendar years. A minimum of forty-two (42) credits of graduate work must be accumulated during the duration of the graduate program.

Degree Completion

Reference [MPH Degree Completion Checklist](#).

Application to Graduate

A student nearing degree completion is required to submit an application for graduation via MCWConnect according to these dates and deadlines.

[Application for Graduation Program Approval](#)

Prior to the start of a student's final term, completion of the application for graduation program approval is required to be submitted to the School of Graduate Studies.

[Approval & Submission](#)

Programs may have additional requirements. Reference Program Handbook for details.

Certificate Completion Requirements

Academic Standing

Students must remain in good academic standing, defined as at least a 3.0 grade point average in courses and an "SD" or better performance in proficiency courses to be eligible to take the PhD qualifying examination and, subsequently, be eligible for degree award.

Time Limit

Certificate candidates must complete all certificate requirements within two (2) calendar years. The minimum amount of credits required for certificate completion varies by program, but is no less than twelve (12) credits.

Under special circumstances, requests for an exception to the program completion time limit or to student status can be submitted to the appropriate Program Director along with justification and must be approved by the Dean of the MCW Graduate School.

Completion

[Application to Graduate](#)

A student nearing certificate completion is required to submit an application for graduation via MCWConnect according to these dates and deadlines.

Evaluations

Annual Evaluations

Every student pursuing graduate studies at MCW is reviewed annually by the student's mentor. This review is provided to the student to facilitate understanding of the student's performance and whether they are meeting expectations of the graduate program. A summary of this review is maintained by the program director of the graduate program, and a report of the review is reviewed by the Graduate School Dean and managed by the Graduate School.

Factors that may be included: 1) course grades, 2) research progress and aptitude, 3) performance on departmental examinations, and 4) overall professional maturity and proficiency. Comments on the evaluation should reflect views of mentor, and where appropriate, the student's committee, including date(s) of the last committee meeting. The mentor should summarize and evaluate the progress toward degree completion, as well as list any accomplishments, publications, or scientific meetings attended by the student in the past twelve (12) months. For students expected to graduate within two (2) years, an anticipated date of degree completion should be indicated.

Students are to provide comment(s) on mentor's evaluation as well.

If a student is judged inadequate on the basis of these or other criteria, the Dean of the Graduate School should be notified in writing. Students who have received a less than satisfactory evaluation will be notified by the Dean of the Graduate School.

Course Evaluations

With limited exceptions all School of Graduate Studies courses are evaluated by all students enrolled in the course for credit. The only courses not subject to student evaluation are those graded on a proficiency or pass/fail scales as well as courses offered off-campus by partnering institutions participating in joint degree programs.

Student evaluations are completed anonymously using OASIS. All students enrolled in the course for credit are required to complete the course evaluation. OASIS keeps track of the students who have completed the evaluation, but that information is not linked to individual students' responses. The Graduate School sends students instructions for completing their course evaluations at the beginning of the semester and informs them that the evaluations must be completed two weeks after the end of the course. The Graduate School provides the students with a reminder one week before the evaluations are due.

At the end of the course evaluation period, the responses for all courses are compiled by the Graduate School and given to each Course Director. In an effort to maintain student anonymity, evaluations having only one or two responses for a given offering will not be forwarded to the Course Director. Course Directors will receive aggregated results for these evaluations once the combined total over multiple offerings of the course reaches three or greater.

Student Responsibility to Complete Course Evaluations

All students enrolled in a course for credit are required to complete the evaluation for that course. Achievement of a 100% response rate is important to the Graduate School's course evaluation process

and to its continued accreditation. The Graduate School may impose a \$100 fine for each course evaluation not completed on time. Students may petition to have these penalties lifted by writing to the Dean of the Graduate School.

Confidentiality and Distribution of Course Evaluation Materials

The compiled student responses obtained through the course evaluation process and the letters to the Course Directors prepared by the Chair of the Course Evaluation Committee contain confidential material. All persons having access to those materials are expected to maintain the confidentiality of the materials. The materials may, however, be shared as follows:

Course Directors: Course Directors are expected to use the information in the compiled student responses and in the letter from the Course Evaluation Committee to improve or maintain the quality of their course. To that end Course Directors are encouraged to share the evaluation materials with faculty teaching in the course. Course Directors are also authorized to share at their own discretion the compiled student responses with relevant Program Directors and Department Chairs.

Program Directors and Department Chairs: Program Directors and Chairs of departments hosting the graduate program receive copies of the course evaluation letters drafted by the Course Evaluation Committee for courses in their graduate program. For courses offered through the IDP or NDP program, a copy of the letter is sent to each of the participating basic science Chairs and, in the case of IDP, to the curriculum committee Chair for that program. For courses offered as part of Institute for Health & Equity, the Director of the Institute is sent a copy of the letter. Course evaluation raw data may also be shared with Program Directors for programs who receive a signed release from their course directors.

Program Evaluation Committee: In the process of reviewing Graduate School programs, members of the Program Evaluation Committee may inspect copies of all letters prepared by the Course Evaluation Committee for courses in a program under review.

Dean of the Graduate School: For courses identified as having "serious problems" by the Course Evaluation Committee on two consecutive offerings, the Dean of the Graduate School may share and discuss the compiled student responses and the letters from the Course Evaluation Committee with the relevant Program Director(s) and Chair(s) or Institute Directors in an effort to assure that the course is improved before being again offered.

Comprehensive Triennial Course Evaluation

The Course Evaluation Committee will make a periodic comprehensive evaluation of courses offered through the School of Graduate Studies. Courses will receive comprehensive evaluations every three years or following every third offering, whichever occurs later. Exempted from this process are course graded on a proficiency or pass/fail scales as well as courses offered off-campus by partnering institutions participating in joint degree programs.

Faculty Evaluations

All students enrolled in the course for credit are also required to complete a four-item form in OASIS for each instructor. You will receive email prompts to direct you to OASIS and to facilitate the task. All students enrolled in a course for credit are required to complete the evaluation for that faculty member. Achievement of a 100% response rate is important to the institution's faculty evaluation process and to its continued accreditation. Students not completing one or more course evaluations by the deadline are

no longer in good standing and are subject to several penalties including denial of future course registration, graduation, confirmation of enrollment, and access to official transcripts. Payment of stipends may be suspended. The Graduate School may impose a \$100 fine for each faculty evaluation not completed on time. Students may petition to have these penalties lifted by writing to the Dean of the Graduate School.

(Approved by Graduate Studies Council January 5, 2009; Reviewed June 26, 2024)

Examinations

Guidelines for Missed Exams

The following guidelines are provided to course directors in establishing the missed exam policy for their courses. Course directors should inform students at the beginning of the course through the syllabus. Information provided in the syllabus regarding missed exams is policy for that course.

- If a student misses an examination due to illness, the student will be allowed to make up the examination within seven (7) days of the scheduled examination. To be allowed to make up the examination, the student must present a note from a physician or other health care provider documenting the illness. At the course director's discretion, the student may be asked to sign a statement declaring that they have not obtained any prior information about the content of the exam.
- If a student misses an examination due to a death, the student will be allowed to make up the examination within seven (7) days of the funeral. At the course director's discretion, the student may be asked to sign a statement declaring that they have not obtained any prior information about the content of the exam.
- If a student misses an examination due to personal travel, the student will not be allowed to make up the examination. However, if a student intends to miss an examination to attend a professional meeting, the course director should be informed as early as possible. The course director, in consultation with the student's mentor, can decide to not excuse the student or to allow the student to take the examination before leaving or to make it up after they return.
- If a student misses an exam due to unforeseen extenuating circumstances, the student should contact the course director as soon as possible to discuss potential options.
- If MCW closes due to inclement weather then all examinations scheduled during the period of closure will be postponed. However, it is recognized that weather is not entirely predictable, and severe weather events may occur during times when MCW remains open. In such circumstances, Course Directors and Program Directors are empowered to postpone any examination where it is determined the safety of students may be compromised. If a student misses a scheduled examination, and it is determined after the fact that a severe weather event was the major contributor to why the student missed the examination, then a good faith effort should be made to provide the student with a make-up examination opportunity.
- If an examination requires internet connectivity, either through MCW or through a student's personal provider service then both electrical and internet outages have the potential to disrupt the examination. In such a case the student should make every effort to contact the course director through text, email or phone call. Such an event may lead to an extension or postponement of the examination at the discretion of the Course Director.
- If the course director and a student are in disagreement over the appropriate course of action in the case of a missed exam due to extenuating circumstances, the Associate Dean of

the School of Graduate Studies will discuss the situation with both the course director and the student and will make the final decision on how to proceed.

(Approved by GSC, June, 21, 2024)

FERPA

Please view the MCW FERPA policy and associated policies in the [MCW All Student Handbook](#).

Grade Appeals

Please see the [Grievance Procedure Policy](#).

Grading Scales

The grading scales for the School of Graduate Studies varies based off of the course that is offered.

Standard Grading Scale

Grades are calculated on a four-point scale as follows:

Grading Key	
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	2.7
F	0.0
AU	No Credit (Student Auditing Course)

Proficiency Grading Scale

Students who register for proficiency graded courses will be evaluated in part on the basis of progress. Progress will be evaluated each term the student is registered for the course by faculty who hold an appointment in the program in which the student is enrolled and must accurately reflect the student's progress as perceived by the faculty. Proficiency graded courses will not be included in a student's GPA calculation; however, a "U" grade does impact a student's academic standing.

Evaluation will be made according to policies established by program, and grades will be determined as follows:

Grading Key	
E	Excellent
G	Good
SD	Substandard
U	Unsatisfactory

Considerations for Evaluating Proficiency Graded Courses

Criteria used to evaluate students in proficiency graded courses should reflect performance related to the student's effort on their dissertation or thesis project. Specifically, it is recommended that mentors evaluate student effort in terms of the Core Qualities and Competencies for Graduate Education. In brief, Core Qualities include:

- Scholarship: the pursuit of knowledge through study and research;
- Innovation: creativity in the generation of new knowledge;
- Professionalism: conforming to the behavioral norms of a profession.

Core Competencies that students are expected to achieve during their training experience include excellence in:

- Knowledge and Skills
- Communication
- Management
- Teamwork
- Leadership

Criteria Used to Evaluate Reading and Research

Due to the varying nature of the research experience across different disciplines and mentors, fixed criteria for grading students are not easily established. Mentors should consider performance relative to the student's stage in the program on the following types of activities when evaluating Reading and Research:

- Written research summaries
- Presentations to the department and dissertation/thesis committee
- Motivation and commitment to research
- Data management and record keeping
- Familiarity with the literature
- Collegiality within the laboratory/group
- Ability to establish and meet pre-set deadlines and goals
- Laboratory/research skills and experimental design
- Oral and written communication skills
- Scientific honesty and integrity
- Research accomplishments and progress towards the dissertation/thesis
- Research problem solving and computing skills
- Creative thinking skills

Rubric for Reading and Research

Student performance in Reading and Research is graded on a proficiency scale as shown above. Examples of student activities have been provided to help clarify these grading designations:

E (excellent) – Student performance exceeds expectations. The student functions primarily independent from the mentor. For example, a student initiates and manages new collaborations related to their project, establishes a new technique for the laboratory or a new method for the research problem, submits their research proposal for outside funding consideration, and/or submits a manuscript for publication consideration. The student successfully troubleshoots a difficult experiment, research or computing problem independent of their mentor, or independently mentors and manages a student.

G (good) – Student performance meets expectations. The student is beginning to function independently but still requires appreciable guidance from the mentor. For example, the student actively participates in a collaboration previously established by the mentor, masters an established technique within the laboratory or problem-solving techniques, works toward initiation, preparation, or completion of their research proposal, and/or prepares a manuscript based on studies from their research project. The student successfully troubleshoots a difficult experiment/research problem with the help of the mentor or works with the mentor to successfully mentor and manage a student.

SD (substandard) – Student performance is below expectation. The student meets the bare minimum requirements established and requires substantial guidance from the mentor beyond what is expected at this point in their training. For example, the student meets deadlines but requires frequent reminders or other input from the mentor or program director. The overall product produced in the laboratory or the progress made on the dissertation/thesis needs improvement in terms of quality, efficiency, and/or timeliness. The student remains unable to successfully troubleshoot an experiment/research problem even with input from the mentor.

U (unsatisfactory) - Student performance is below minimum standards and corrective actions are required. There is a general lack of engagement by the student. The student fails to take ownership of their research project even after significant input from the mentor. The student fails to engage in timely communication, and overall student effort suffers from a lack of commitment to research.

Recommendation when assigning an SD grade for Reading and Research

Mentors who assign an “SD” in Reading and Research should plan to meet with the student to discuss the specific activities that have failed to meet expectations. Recommendations on how to improve student performance in these areas should be discussed and/or documented, and when warranted, specific milestones developed and periodically evaluated with the student to improve performance to one that meets expectations.

Policy for assigning a U grade for Reading and Research

Mentors should be aware that a "U" in Reading and Research automatically places a student on probation, and two "U" grades are grounds for dismissal from the Graduate School. Given the significance of this grade, prior to assigning a “U”, the Mentor will consult with members of the Dissertation/Thesis Committee and the Director of the Graduate Program for feedback on the appropriateness of the decision. If there is consensus that the student performance is evaluated as Unsatisfactory, a letter explaining the basis for this grade and detailed corrective measures and strategies shall be submitted to the Director of the Graduate Program and to the Dean of the School of Graduate Studies. A student who receives a second evaluation as Unsatisfactory during any subsequent term of study will be considered for dismissal.

Pass/Fail Grading Scale

Students who register for pass/fail courses will be evaluated based off of satisfactory completion of a course by the Course Director. Pass/fail courses will not be included in a student’s GPA calculation.

Grading Key	
P*	Pass
F*	Fail

Incomplete Grades

A grade of “I” for incomplete is used only when a student has completed at least 75% of the course and is otherwise not able to complete course requirements for some acute and unexpected circumstances beyond the student's control. The Course Director must grant an incomplete for the student to receive additional time to complete the course. Incomplete coursework for the fall term is due January 31st of the following year. Incomplete coursework for the spring term is due July 31st. Incomplete coursework for the summer term is due September 15th. A pending graduate with an incomplete grade on their record in the last term of enrollment must complete the coursework by the established deadlines. The date of graduation will reflect the graduation date for the term in which the course began, not the term in which the coursework was completed. A student may not receive an incomplete if they begin a permanent or temporary withdrawal during the course.

(Graduate Studies Council Approved June 24, 2024)

Laboratory Safety

Laboratory safety policies and procedures can be found at the [Environmental Health and Safety website](#). Questions and information regarding lab-specific guidance can be directed to the principal investigator.

Learning Management System

Brightspace

Every student will use Brightspace, the learning management system, for courses and for Graduate School resources and orientation. A Brightspace account will be created for you by IS upon accepting an offer of admission. Directions with username and password will be sent to your MCW email address. Students are held responsible for communications from within Brightspace.

For technical assistance with Brightspace, please contact Learning Management System Help at - lmshelp@mcw.edu.

Off-Campus Training & Research

The School of Graduate Studies of the Medical College of Wisconsin is committed to providing a complete research experience to all PhD-seeking graduate students. Students will conduct research under the direct supervision and mentorship of a member of the MCW Graduate Faculty. It is expected that this research will be conducted in Medical College of Wisconsin facilities or in facilities provided by an institution affiliated, or contractually related, with the Medical College of Wisconsin. With permission of the research mentor, a student may receive training or conduct research at another institution or organization for a limited period of time. For domestic students, if the period of continuous away time exceeds 60 days, this arrangement must be pre-approved by the student's graduate program and the School of Graduate Studies Dean and must be supervised jointly by an MCW faculty member and a researcher at the non-affiliated site. For international students, the Dean of the School of Graduate Studies in conjunction with the International Learners Center (ILC) may approve training experiences that remain in compliance with the Immigration and Naturalization Service regulations requiring continuous direct supervision by MCW Graduate Faculty. Off-campus research may not exceed one calendar year.

(Graduate Studies Council Approved February 3, 2009; Reviewed June 26, 2024)

Technical Standards

Technical standards, distinguished from academic standards for admission to the MCW School of Graduate Studies, consist of the minimum physical, cognitive, and emotional attributes required to provide reasonable assurance that a student can complete the entire course of study and participate fully in all aspects of their training. Technical standards described here are a prerequisite for admission to, and for graduation from, the MCW School of Graduate Studies.

- **Physical Requirements:** After adequate training and experience, the candidate must be capable of performing the experimental work required by the graduate program which they have entered. The specific requirements will vary from program to program, and within the specific research area within a program.
- **Communication:** A candidate must be able to communicate effectively with, and receive communication from, other scholars in relevant fields. Communication includes speech and writing.
- **Intellectual, Conceptual, Integrative and Quantitative Abilities:** A candidate must have the critical, problem-solving skills required in the proposed field of study. These skills include the ability to measure, calculate, reason, analyze and synthesize.
- **Behavioral and Social Attributes:** A candidate must possess the emotional health, maturity and self-discipline required for full utilization of their intellectual ability and for successful participation in and completion of the program of study.
- **Evaluation:** The Medical College of Wisconsin may require that an applicant undergo a skills evaluation. The Medical College of Wisconsin will endeavor to select and administer evaluations that accurately reflect the applicant's or student's aptitude or achievement level rather than the applicant's or student's disability.

The MCW School of Graduate Studies is committed to capitalizing on technological advances that create new opportunities for participation by disabled persons and will incorporate changes into its programs where feasible. The MCW School of Graduate Studies is committed to providing accommodations for disabled persons in accordance with applicable federal, state and local laws and in conjunction with the policies established by the MCW Department of Human Resources. A qualified, disabled applicant shall not on the basis of the disability (except those which would preclude meeting the technical standards outlined above) be excluded from participation in graduate programs of the Medical College of Wisconsin.

Technology Requirements

The following are minimum technology requirements provided by MCW Information Services (IS):

- Laptop with 14 inch or larger screen
- 16GB RAM
- 512 GB Storage
- External or Built in Webcam
- Machine no less than 2 years old
- Battery capacity of minimum 4 hours

Specific programs may have additional technology requirements.

Transfer

Transfer to another MCW Graduate Program

Purpose

The purposes of these guidelines are to protect the student's interest, to foster communication, and to minimize potential conflicts between departments or programs.

Policy

On occasion, a student may decide that their area of interest is outside the department or program in which the student is currently enrolled. When this happens, the student should discuss the issue with their present mentor and/or with the program director to determine whether transfer to another program would be appropriate and beneficial for the student. If a transfer is deemed appropriate, the program director will notify the School of Graduate Studies

The student should then consult the program director of the potential department or program as to the possibility of doing graduate research in that department or program. If the program director agrees that there is a good opportunity for the student to be in this department or program, they will notify their chairperson of the request. The program director will also contact potential faculty members within the department or program of the student's interest.

A student seeking to transfer from one department to another must make a request to the Dean in writing, obtain written support from the current mentor, and the mentor to whom the student wishes to transfer. Letters of support must include provision for continued stipend funding. All students must complete the degree within the timeframe allowed by policy which begins upon matriculation to the School of Graduate Studies.

(Graduate Student Council Approved July 12, 1993; Reviewed June 26, 2024)

Transfer from another Graduate School

Applicants to the MCW School of Graduate Studies are, in general, only accepted upon completion of the degree program in which they are currently matriculated. In special circumstances, students may apply for transfer into graduate programs at MCW after having only partially completed requirements for a graduate degree at another university. Transfer will be considered upon recommendation of the program that the applicant is pursuing as long as the following conditions are met:

- At the time of application, the academic status of the student at the other university is clearly documented and the reasons for wishing to transfer are clearly disclosed by the student.
- The student has submitted and completed a full application, including an official transcript from their current institution and three (3) letters of recommendation. We recommend that one (1) be from their current mentor or research mentor, and one (1) be from someone who can appraise the student's work at their current school.

If transfer is allowed, the MCW School of Graduate Studies program that the student is pursuing will compare the course work completed at their current school with the curriculum required at MCW. That analysis will determine which courses remain to be taken. The applicant must meet the following requirements of an MCW degree program regardless of whether any have been fulfilled elsewhere:

- Two (2) terms of full-time study.
- Successful completion of the qualifying examination conducted by members of their program.
- Successful completion of the thesis or dissertation under regulations which exist within the MCW School of Graduate Studies
- Successful completion of all other requirements of the program.

If a transfer student is an international student, contact International Learners Center (ILC) (internationalstudent@mcw.edu) to receive more information.

Transfer of Credits

The number of credit hours which may be transferred from other institutions is limited to protect the integrity of the MCW School of Graduate Studies programs. Only credits directly applicable to a student's MCW program will be considered for transfer. There is no guarantee that all credits previously earned will be approved for transfer. Students should consult their current mentor or program director prior to requesting a transfer of credits earned elsewhere and before taking additional graduate courses for which they may want to transfer credits.

Students seeking to transfer credits earned prior to admission, including any earned at MCW, must file an [Application for Transfer of Credit](#) form with the Office of the Registrar. If the credits were not earned in the MCW School of Graduate Studies, an official transcript of the coursework listed on the form must be sent from the transfer institution directly to the Office of the Registrar. Also, syllabi from the transfer courses listing textbooks and other materials used in the course must be submitted with the transfer credit application. Students will be notified in writing by the MCW Office of the Registrar regarding which credits have been accepted for transfer.

Limits on transfer of credits:

- Certificate Programs: No credits may be transferred into a certificate program from another institution. A maximum of six (6) approved credits taken at MCW as a non-degree candidate may be transferred to the certificate program.
- Transfer of Credits from a Certificate Program into a Degree Program: Transfer of appropriate credits from a certificate program into a degree program is automatic if matriculation in the degree program occurs within one (1) year of completion of the certificate program. If the certificate was earned more than one (1) year before matriculation in a degree program, then appropriate credits may be transferred if approved by both the Program Director. In general, credits will not be transferred for courses completed more than three (3) years before matriculation in a degree program.
- Master's Degree Programs: With the exception of credits earned in an MCW certificate program (see above), the maximum number of credits that may be considered for transfer to an MCW School of Graduate Studies master's degree program is the larger of either ten (10) credits or 1/3 of the total number of graduate credits required for the particular master's degree program. This total includes coursework taken at MCW prior to admission and credits earned at other institutions during enrollment in the MCW degree program.
- Doctor of Philosophy Degree Programs: The maximum number of credits that may be considered for transfer to an MCW School of Graduate Studies doctoral program is twenty (20). This total includes coursework taken at MCW prior to admission and credits earned at other institutions during enrollment in the MCW degree program.

- Doctor of Public Health Degree Program: The maximum number of credits that may be considered for transfer to the Doctor of Public Health Program is the larger of either eighteen (18) credits or 1/3 of the total number of graduate credits required for a doctorate level program. This total includes coursework taken at MCW prior to admission and credits earned at other institutions during enrollment in the MCW degree program.

Credits are eligible for transfer only if the grade earned is a B or better (3.0 on a 4.0 scale). Pass/Fail or Proficiency scale courses are not eligible for transfer. Graduate credits earned more than five (5) years before the start of the MCW graduate program are not eligible for transfer. Credits applied to one baccalaureate, graduate or professional degree are not eligible for transfer to an MCW certificate or degree program; however, they may be used to guide alternative course selections to be taken toward a second-degree program. Grades do not transfer to MCW. All transferred courses receive a grade of TR and are not included in the GPA calculation.

Turnitin

The Graduate School offers a plagiarism detection tool through Turnitin and can be added to a class assignment in Brightspace by faculty in an instructor role for classes in Brightspace. A guide can be found [here](#).

Reading & Research

Reading and Research credits can be registered for multiple times by term. Reading and Research is a course designed to provide evaluation and credit for non-didactic educational activities. This may include directed readings and/or laboratory research training. Individual programs may require additional activities. A student may register for this course concurrently in more than one department or program and with more than one faculty member within a department or program. Grades will be assigned individually by each preceptor according to the Graduate School Grading Policy. Registration for Reading and Research must be approved by the preceptor for each Reading and Research registration and by the student's mentor or the program director.

(Graduate Studies Council Approved March 16, 1995; Reviewed June 26, 2024)

Registration

Students must register during the time periods indicated on the [academic calendar](#).

Students are expected to complete their registration online via MCWConnect within the published timeframe. Information regarding registration will be communicated to students via MCW email. Registration after the published add/drop deadline will not be fulfilled. Course director has final approval for all registrants.

Add/Drop

The add/drop period for courses is the Friday of the first week of courses. Change of registration must be made in MCWconnect by the deadline indicated on the academic calendar. Students who drop a course within the add/drop period receive no grade and the course does not appear on their transcript. Students who withdraw after the add/drop period will be considered a course withdrawal.

Guest Students

Guest applicants will need to provide documentation from their primary institution indicating approval to enroll in the course(s) they are seeking admission to. Documentation can be sent to gradschool@mcw.edu. Be mindful of the course dates that you wish to enroll in and submit your application by the priority deadline date associated with the program that offers the course. No additional documentation is needed except for your online application submission and permission from your home institution to enroll in the course you are seeking. Applications are accepted/reviewed on a rolling basis.

Non-MCW Course Registration

Graduate courses at approved local institutions are available without payment of tuition to degree-seeking students under the following circumstances:

- The course is not available at MCW.
- The course is a graduate level course.
- The course is relevant to the MCW degree program to which the student has been admitted, and the student's primary mentor or program director recommends that the student take the course.
- All requests to register for courses must be made through the MCW Office of the Registrar before registration can occur. If a student fails to follow the procedure, tuition charges from the approved institutions will be incurred by the student.
- Requests are subject to review by the Dean of the School of Graduate Studies for final approval.

Graduate courses taken under the terms described above are recorded on the student's MCW transcript, are counted as credits taken off campus, and if awarded a letter grade, affect the student's GPA.

Time Status

Full-time & Part-Time Status by Credit

- Registration as a part-time student is specified as:
 - One (1) to Eight (8) credits during the Fall and Spring terms, and;
 - One (1) to Five (5) credits during the Summer term
- Registration as a full-time student is specified as:
 - at least nine (9) credits per term during the Fall and Spring terms, and;
 - at least six (6) credits during the Summer term

Undergraduate Courses

Undergraduate courses, which are prerequisites for admission, should be taken before the student begins their graduate program. Undergraduate courses taken at neighboring institutions are not eligible for tuition waiver or MCW School of Graduate Studies credit. In exceptional circumstances, the MCW School of Graduate Studies or program may help students enrolled for needed undergraduate courses at neighboring institutions. Tuition charges will be the responsibility of the student.

Repeating Courses

Students are permitted to retake any academic course* with the permission of their program and course directors. Students may retake the course in a subsequent offering. Tuition will be charged at the current rate at the time of registration.

Both grades will appear on the student's transcript with the lower grade having an "E" for exclude and the higher grade having an "I" for include. Only the highest grade from a course will be used when calculating the student's grade point average for the purpose of determining probationary status and eligibility for the awarding of a graduate degree.

**This policy does not apply to those courses that are designed to be taken multiple times.*

(Graduate Studies Council Approved July 12, 1995; Reviewed June 26, 2024)

Student Access to and Use of Educational Materials

MCW Graduate Faculty Members author or otherwise create educational materials with the aim of providing an excellent education for graduate students. However, the transition of educational materials from hardcopy to digital formats has heightened concerns about ownership, fair use and liability for unapproved and perhaps illegal uses of educational materials. More specifically, with the digital nature of the educational materials (e.g., audio files, PDFs, on-line examinations), students can easily download and export, edit/revise and circulate files beyond the intended use.

For the purposes of this policy, educational materials include exams, lecture notes, outlines, instructions for homework assignments, Power Point presentations, study guides, audio, video and/or digital files and/or any materials authored or created by MCW faculty for use in courses.

The policy applies to all educational materials spanning all formal courses, as well as other educational venues (e.g., PDA applications and simulations; Apps, presentations to student interest groups).

- Under MCW's [Patent and Copyright Policies](#), copyright rights in educational materials are owned by MCW faculty, and in some cases MCW or other institutions.
- Educational materials are provided to students enrolled in MCW solely for students' personal use.
- The materials should not be used for any purpose other than that intended by the faculty member(s) who authored/created the materials.
- Educational materials are not to be altered, copied, excerpted, incorporated into other works, shared, exchanged, sold or otherwise distributed to anyone without the written permission of the Course director and the faculty member(s) who authored/created the materials.

Failure to comply with the use policy will be deemed professional misconduct and will be addressed under the Medical College's existing policy on Professional Misconduct and may result in a disciplinary sanction up to and including dismissal.

(Graduate Studies Council Approved February 3, 2014; Reviewed June 26, 2024)

Withdrawal

Course

Students who withdraw from a course after the add/drop period and before the end of the term will receive a “W” grade on their academic transcript. To withdraw from a course, submit this [form](#) to the Office of the Registrar. Information regarding tuition implications can be found [here](#).

Program

A student wishing to withdraw from a degree seeking program must complete the withdrawal [form](#). The effective date of withdrawal should be indicated on the form. Student are expected to notify their Program Director and Mentor. The completed form should be submitted to the MCW School of Graduate Studies for approval. The MCW School of Graduate Studies will coordinate with the Office of the Registrar and other school officials. International students must contact the International Learners Center prior to formally withdrawing.

Administrative Withdrawal

Administrative withdrawal will occur for any student who has not registered for courses for three consecutive terms unless the student has an approved temporary withdrawal.

Temporary Withdrawal

Under certain circumstances, it may be necessary for a student to request a temporary withdrawal from graduate study. A student wishing to take a temporary withdrawal should adhere to the following procedure:

- Notify the Program Director or mentor of the proposed leave.
- Complete the [Temporary or Permanent Withdrawal Form](#), obtain the required signatures and submit the completed request to the School of Graduate Studies. The request must include: starting and ending dates of the proposed leave, the reason for the request, and any additional information which might be needed for an understanding of the implication of the proposed leave on completion of the degree program.
- The Office of the Registrar will notify the student in writing of approval or disapproval of the Request for a Leave, and will notify the student’s program director and other officials as needed.
- It is the student’s obligation to be in communication with the program director, Graduate School, and Office of the Registrar in advance of the temporary withdrawal return date regarding whether or not a return to academic study will occur as planned. If the leave expires without such communication, it will be concluded that the student has withdrawn from the program. Reapplication would be required if the student wishes to resume a degree program at a later date.
- Accumulated time away from a program may not exceed one year.
- International students are subject to visa regulations at all times. Prior to submitting the temporary withdrawal form, international students should contact the International Learner Center.
- Insurance impacts must be discussed with the School of Graduate Studies prior to their temporary withdrawal.

(Graduate Studies Council Approved June 7, 2010, Reviewed June 26, 2024)

Section 4: Non-Academic Regulations

Anonymous Reporting

If a student wishes to report a perceived injustice or instance of professional misconduct, that they have witnessed or been subjected to, in an anonymous way, then they should file a report using the third-party MCW reporting hotline or [report form](#). Complaints will be routed through the office of the Associate Provost to the relevant school for appropriate action.

Attire

Please reference the [MCW All-Student Bulletin](#).

Background Checks

The School of Graduate Studies requires criminal background checks for students as a condition of their admission and/or continued enrollment at the Medical College of Wisconsin. Information regarding completing the background check is sent to admitted students via their MCW email prior to matriculation.

Commencement

Please reference the [MCW All-Student Bulletin](#).

Conflict of Interest Policy Statement

All students of the Medical College of Wisconsin are expected to abide by the institution's [Code of Conduct](#) at all times. This includes a responsibility for all members of MCW to conduct themselves in an ethical manner and demonstrate transparency and integrity in all dealings.

(Corporate Compliance AD.CC.010; Reviewed 09/06/2022)

Corporate Policies

Corporate policy information can be found on the [Corporate Compliance Infoscope page](#).

Financial Aid

The MCW Financial Aid Office is available to instruct and counsel students throughout your enrollment at MCW. Questions or concerns can be directed via phone (414-955-8208) or e-mail (finaid@mcw.edu).

Emergency Loans

The Medical College of Wisconsin will grant Emergency Loans to full-time registered students during the academic year for a maximum of 90 days. The maximum limit of \$1,000 is available and may be granted to students twice during the academic year, once during each half of the year. The loans will be interest-free for the first 90 days, after which, interest will accrue at the rate of 12% per annum. All outstanding Emergency Loans due the Medical College of Wisconsin must be paid before graduation for the diploma to be presented. Contact MCWtuition@mcw.edu for more information

FMLA

All full-time PhD seeking graduate students are considered research assistants, a unique part time employment category of the Medical College of Wisconsin. The status of graduate students in terms of their academic/employee designation can be complex and confusing. Research assistants 'work' 20 hours per week and receive stipends funded primarily via GSBS for the first year and a half. Stipend continuation is provided through training grant support or departmental funds throughout the degree program. Research assistants are governed by graduate school policies and procedures and are covered by a student health insurance plan.

Wisconsin law provides part time employees who have worked at least 1000 hours in the preceding 52 consecutive weeks, the opportunity to take a temporary withdrawal for

- Serious Health Conditions
- Parental Leave

Generally, research assistants in their second year or beyond of their graduate programs qualify for Wisconsin's Family Medical leave. First year full time PhD seekers do not qualify.

Serious Health Condition: Up to two weeks for your own serious health condition or that of a parent, child or spouse. Serious health condition means a disabling physical or mental illness, injury, impairment or condition involving inpatient care in a hospital, nursing home or hospice, or out-patient care that requires continuing treatment or supervision by a health provider.

Parental Leave: Following childbirth or adoption of an infant, the primary care giver (whether male or female) would be allowed to take 30 workdays (6 weeks) of parental leave with full stipend and continued health insurance coverage. Vacation days are to be used concurrently beginning with the first day of the leave. This leave can be viewed as composed of the 30 calendar days allowed by NIH training grant policy for parental leave per year, In the event of a graduate student wishes to extend the leave beyond this period she/he has the option of leave without pay, however he/she will need to pre-pay MCW's portion of the health care premium, along with monthly premiums for dental and vision insurance.

To request Family Medical Leave, follow the steps for "Temporary withdrawal from a Degree Program" as above except at step 2 you must talk/meet with the Director of Enrollment in the Graduate School to discuss your leave request. If conditions are met to also apply for Wisconsin's Family Medical Leave you will be provided with information and guided through the remainder of the process by Human Resources. Steps 3 and 4 remain the same as above.

Foreign Nationals are subject to visa restrictions at all times.

(Graduate Studies Council Approved June 7, 2010)

Grievance Procedure

Purpose

The School of Graduate Studies is committed to a policy of treating all members of the Medical College of Wisconsin community fairly in regard to their personal and professional concerns. The primary objective of a student grievance procedure is to ensure that concerns are promptly dealt with and resolutions reached in a fair and just manner. It is essential that each student be given adequate

opportunity to bring complaints and problems to the attention of college administration with the assurance that each will be given fair treatment.

Definition of a Grievance

A grievance is defined as dissatisfaction occurring when a student feels or thinks that any condition affecting them is unjust, inequitable, or creates unnecessary hardship. Such grievances include, but are not limited to, the following: Academic problems, (disputes over assignment of grades, decisions about program or degree requirements, or claims that course requirements are unfair), mistreatment by any college employee, wrongful assessment and processing of various fees, records and registration errors, and discrimination because of race, national origin, sex, marital status, religion, age, or handicap. Grievance procedures do not apply to actions involving professional misconduct (dishonest, unethical or irresponsible behavior), sexual harassment, suspension, and dismissal for cause.

Grievance Procedure

This section sets forth the procedures that should be followed by a student who believes that they have been unfairly or improperly treated by a fellow member of the MCW community.

All students enrolled in the School of Graduate Studies are eligible to use the Grievance Procedure. The Grievance Procedure is designed to provide a formal mechanism whereby students may seek redress of grievances encountered while in pursuit of graduate education.

Informal Procedure

The initial step of the student grievance procedure is for the student to first try to seek resolution or redress through discussions with the person(s) alleged to have caused the grievance. This meeting should be held as soon as the student first becomes aware of the act(s) or condition(s) that are the basis for the grievance. If the student feels that a satisfactory solution or relief has not been provided, the student should discuss the grievance with their mentor, Program Director, and/or Chair. The Associate Dean of Academic Affairs is available to help mediate and negotiate an equitable resolution to any grievance. If the grievance is still not resolved, the student should proceed to the formal grievance procedure.

Formal Grievance Procedures

1. The grievance and the solution requested must be clearly stated in writing to the Graduate School. Regardless of who the grievance is with, the must be presented to the student's mentor within fifteen (15) calendar days from the date the student first became aware of the condition or action giving rise to the complaint. An untimely filed grievance is of no effect. The mentor must respond in writing to the grievant within five (5) calendar days of receipt of the Grievance Form.
2. If the answer to Step 1 does not resolve the problem, the student may within five (5) calendar days of receipt of the Step 1 answer, file the grievance form with a written request to the Program Director or Chairman. Within fifteen (15) days of receipt of the Step 2 grievance, the Program Director or Chairman will schedule and conduct a meeting with the aggrieved student to discuss the grievance and requested solution. Within five (5) calendar days following this meeting, the Program Director or Chairman will render a written decision to the student.
3. If the Step 2 decision does not resolve the problem, the student may within five (5) calendar days of receipt of the Step 2 decision, file the grievance form with a written request to the Dean of the Graduate School, together with all correspondence from Steps 1 and 2. The Dean will

refer the matter to the Admissions and Student Welfare Committee which will review all material. Investigatory meetings with the student, mentor, Program Director or Chairman may be held, as appropriate. They will gather data representing all points of view; evaluate the situation and make recommendation to the Dean within thirty (30) calendar days from the date the Step 3 grievance is filed. Within ten (10) days of receipt of the Committee's recommendation, the Dean will prepare a final recommendation. This decision is final.

Special Notes

The subject and scope of the grievance cannot change at any step in this procedure.

Except when the time limits have been changed by mutual consent of the parties involved the following will be adhered to:

- If a written answer is not received at any step within the specified time frame, the grievance may be appealed to the next step.
- Failure to file a timely appeal of the decision at any step will render that decision final.
- Time limits can be extended with approval of the Dean.

(Graduate Studies Council Approved December 9, 1996; Reviewed June 26, 2024)

Health Insurance

All full-time MCW degree-seeking students are required to have health insurance. Some students are covered under health insurance policies of their parents, spouses or full-time employer. Proof of insurance coverage is required. Students who are not otherwise covered are required to enroll in the plan offered by MCW. Please contact gradschool@mcw.edu with any questions.

The annual premium for single coverage will be paid by MCW for all full-time, PhD degree-seeking students on a stipend. Students, at their own expense, may acquire insurance under the same plan for their spouse and/or family. Optional dental, vision, and life insurance are available at the student's expense.

Immunization Requirements

Please reference the [MCW All-Student Bulletin](#).

CastleBranch

For all Master of Science in Genetic Counseling students, all required immunization records, background checks, necessary testing (titers, PPD, etc.), CPR certification, and related health requirements for matriculation will be stored in CastleBranch for ongoing monitoring throughout the duration of enrollment. Access to CastleBranch will be available to students beyond their education at MCW. It is the responsibility of all students to submit all required health and background information in CastleBranch by the specified due dates. Failure to submit items by the due dates is considered unprofessional behavior and may also result in students being prohibited from participating in clinical rotations and other related activities.

MCW Email

All electronic communication to MCW graduate students occurs through the use of MCW email accounts. All students are required to use their MCW email account throughout their enrollment tenure, including joint-degree students.

Upon admission to the MCW School of Graduate Studies, an email account is created on behalf of the student. A username and password will be communicated to the student's personal email address with explicit directions from the MCW Information Services (IS).

For assistance accessing your MCW email, please contact the MCW IS help desk at 414-955-4357 or help@mcw.edu.

Post-Graduate Disciplinary Action

This policy is intended to address allegations including but not limited to professional misconduct (defined as dishonest, unethical or irresponsible behavior) and/or academic dishonesty which become known and are brought after the degree has been awarded but the events of which occurred during the matriculation period.

(Corporate Compliance ED.GS.010; Reviewed August 15, 2023)

Professionalism

Professionalism is an important part of maintaining integrity within the School of Graduate Studies. Below is an outline of how students may maintain professionalism in their responsibilities and relationships. This list is not exhaustive.

- Take responsibility for both good decisions and mistakes in an honest manner and make corrections as needed.
- Accept and consider constructive criticism; take care to recognize one's limitations and seek assistance when in need.
- Be respectful of peers and teachers of differing backgrounds, opinions, values and lifestyles.

Breaches of professionalism include, but are not limited to, the following:

- Being disrespectful or participating in bullying, including cyber bullying, of peers, teachers or staff in any setting, including but not limited to in-person interactions, online and in social media.
- Shirking responsibilities in the classroom, laboratory, or any educational space.
- Avoiding addressing one's mistakes or attributing false blame.
- Being late to class, disregarding punctuality, or disrupting class.
- Violating patient's physical privacy or informational privacy as protected by HIPAA.

Suspected violations of professionalism should be reported to the Program Director and/or the Graduate School Dean.

Any alleged violations of Professional Misconduct brought to the attention of the Graduate School will be investigated following the institutional [Professional Misconduct Policy](#) and/or the Graduate School's Professional Misconduct Policy (see below). The consequences of professional misconduct range

depending on the type and severity of the misconduct but can include dismissal from the graduate program and revocation of any awarded degrees or certificates.

(Graduate Studies Council Approved June 21, 2024)

Graduate School Professional Misconduct Policy

All Graduate students should demonstrate, both individually and collectively, honest, ethical and responsible behavior in academic endeavors, individual and collaborative research, and any other interactions with colleagues, peers and other persons.

Graduate students should uphold high standards of honest, ethical and professional behaviors accumulated into three domains of academic integrity, scientific research rigor and integrity, and professionalism. While faculty and staff have the right to set academic, research and professional requirements, they should also work with students to establish optimal conditions for these requirements.

Students, as members of the MCW community, must be active enforcers of honest, ethical and professional behaviors. As such, if they witness or perceive a violation they should report the incident to a faculty/staff member or Graduate Program Director and/or the Graduate School.

Academic Integrity

Academic integrity is essential, not only to accurately assess the performance of students, but also to respect the faculty and staff who have dedicated their time to teaching. Students have an individual duty to uphold this ideal of integrity and therefore must abstain from cheating and other dishonest behavior in regards to any activity, work, or production which affects the grade or perception of any student. This includes, but is not limited to, examinations, graded assignments, and classwork. Cheating is defined as, but not limited to:

- Copying or discussing answers during examinations, including electronic, written, oral or take-home exams;
- Collaborating during online, written, oral or take-home exercises unless explicitly permitted by faculty;
- Logging into an electronic system and claiming to be someone other than yourself;
- Using non-permitted materials, such as notes, books or electronic devices, during any exercise that impacts students' grades unless explicitly permitted by faculty;
- Copying work that is not one's own, fabricating or falsifying assignments, or other materials;
- Preventing other students' access to reference materials or other study materials;
- Reproducing any part of test material through means including, but not limited to, photography, written copying, reconstruction through memorization and/or dissemination in any form to any person or party;
- Failing to respect copyright and means for distribution within faculty and staff expectations;
- Exploiting technology and/or technological malfunctions for individual or group benefit, colloquially known as "abusing the system".

In addition, staff, faculty and students have an obligation to maintain a non-disruptive environment during examinations to the best of their abilities. By default, students should assume that graded assessments are performed individually unless told otherwise. Faculty and staff also have an obligation to communicate with students when collaboration is or is not appropriate.

Scientific research rigor and integrity

Since graduate students are often heavily involved in scientific research, they need to make every effort to ensure that research uses a robust, unbiased and reproducible study design, a scientifically defensible methodology for data analysis, objective interpretation and reporting of findings. At MCW, the principles of responsible behavior in research are similar to [international standards](#) including:

- The research being reported should have been conducted in an ethical and responsible manner and should comply with all relevant legislation;
- Researchers should present their results clearly, honestly, and without fabrication, falsification or inappropriate data manipulation;
- Researchers should strive to describe their methods clearly and unambiguously so that their findings can be confirmed by others;
- Researchers should adhere to publication requirements that submitted work is original, is not plagiarized, and has not been published elsewhere;
- Authors should take collective responsibility for submitted and published work;
- The authorship of research publications should accurately reflect individuals' contributions to the work and its reporting;
- Funding sources and relevant conflicts of interest should be disclosed;
- Misrepresentation of research findings by choosing an unjustified analytic technique to support some findings over others;
- Failing to report unfavorable results (example: selective or partial use of data);
- Stretching study conclusions beyond reasonable generalizations.

Suspected violations of scientific rigor should be reported to the principal investigator of the study Graduate Program director and/or the Graduate School. Suspected Research Misconduct is also subject to this corporate policy.]

(Graduate Studies Council Approved June 21, 2024)

Procedure Relating to Graduate Students

1. When an allegation of professional misconduct (dishonest, unethical, or irresponsible behavior) is made, the Dean will, at their discretion and with consultation as deemed necessary, investigate the allegations, and attempt to determine the merit and validity of the allegations. If, after investigation, the Dean determines that there are insufficient grounds to believe that a student has committed professional misconduct, the complaint will be dismissed and will not be recorded in the academic file.
2. If the Dean determines that there are sufficient grounds to believe that a student has committed professional misconduct, the matter will be handled as follows:
 - a. If a student admits guilt, the Dean may impose an appropriate disciplinary sanction other than dismissal, including academic probation or suspension, in accordance with

the disciplinary sanctions below. Any sanction imposed by the Dean may be appealed by the student to the Academic Standing and Welfare Committee (apart from dismissal).

- b. If the Dean believes that dismissal may be an appropriate sanction, the case will be referred to the Ad Hoc Disciplinary Committee.
- c. If the student does not admit guilt, the Dean shall refer the case to the Ad Hoc Disciplinary Committee for adjudication.

Disciplinary Sanctions

1. Reprimand: formal action censuring a student for failure to meet the standards of honest, ethical and responsible behavior of the Medical College of Wisconsin. Reprimands are made in writing and will become part of the student's academic file. A reprimand will include the statement that continuation or repetition of misconduct may result in a more serious disciplinary action.
2. Disciplinary Probation: formal action that establishes conditions upon a student's continued attendance for failure to comply with the Medical College of Wisconsin's standards. The student will be notified, in writing, of the probation and conditions thereof. Disciplinary probation warns the student that any further misconduct may result in more serious disciplinary action, including dismissal and results automatically in loss of institutional financial support. Probation may be imposed for a specified length of time or until graduation.
3. Suspension (mandatory leave of absence): formal action that defines a specific period of time during which the student may not attend classes or engage in research, consequent to a breach of Medical College of Wisconsin standards. Students will accrue no academic credit for any course work in progress (including Readings and Research) when the suspension becomes effective. Students will be notified, in writing of the suspension and conditions thereof.
4. Dismissal: formal action that results in a student's permanent separation from the Medical College of Wisconsin. See policy on dismissal below.

Appeal of Sanction (Not Dismissal)

If the student responds in writing within ten business (10) days requesting a hearing regarding their sanction, the Dean will then advise the Academic Standing and Welfare Committee to conduct a hearing under the following conditions:

- a) The hearing should be held not less than five (5) nor more than fifteen (15) business days after receipt of the request by the student. An extension of time for the hearing should be authorized by the Dean only for compelling reasons.
- b) The student's academic file and all correspondence related to the proposed sanction should be made available to the student in advance of the hearing.
- c) The student should be able to present any witnesses of their choosing and should have the right to confront witnesses against themselves, if any.
- d) If the student does not appear for the hearing (personally or through counsel) without a satisfactory explanation for the absence, or if the student leaves the hearing before its conclusion, the hearing should proceed without the student, and a decision should be rendered based on the available evidence.
- e) The Committee should maintain an orderly hearing and permit no person to be subjected to abusive treatment. The Committee may eject or exclude anyone who refuses to be orderly.

The Committee may question witnesses. The Committee chair should rule on all questions of procedure or admissibility of evidence and the chair's ruling is conclusive.

- f) The hearing is not public and should be closed to everyone other than members of the Committee, the student being reviewed, appropriate legal advisors for each of them, the person designated to record the hearing, and witnesses, while they are presenting evidence.
- g) The Committee should make a recording and written summary of the hearing.
- h) Following presentation of evidence, all other participants will be asked to withdraw, and the Committee will privately consider the evidence and reach a decision. A majority vote of the Committee members is required for a binding decision. The Committee chair will advise the student, at the earliest opportunity, of the decision.

If the Committee finds that sanction of the student is not warranted, the student will be notified. If the Committee finds that the sanction was warranted, the student will be notified that the sanction will be imposed.

Formation of the Ad Hoc Disciplinary Committee

Whenever an Ad Hoc Disciplinary Committee is needed, the Dean of the Graduate School will choose a Committee Chair from among the members of the Graduate Studies Council. The Committee Chair will randomly select six panel members from the Graduate Studies Council, including one student, who together with the chair will constitute the Ad Hoc Disciplinary Committee for the following purposes, related to professional ethics violations:

1. A hearing for the purpose of imposing a sanction when a student admits a violation, if dismissal is one possible sanction.
2. A hearing to determine whether a professional ethics violation has occurred when the student does not admit guilt, and to impose a sanction, if appropriate.

Hearing Procedure

1. The Dean will give a student written notice of the charges, the time and place of the hearing, a list of the Ad Hoc Disciplinary Committee members, a list of witnesses, and copies of any documentary or other evidence that will be presented at the hearing. The notice may be amended at any time prior to the hearing, but if the amendment is prejudicial to the student's case, the hearing shall be rescheduled to a later date.
2. The hearing will be scheduled no earlier than five (5) business days after notice is delivered to the student. Every attempt should be made to begin the hearing within fifteen (15) business days after notice is delivered.
3. No member of the Ad Hoc Disciplinary Committee will participate in any case in which that member is a complainant or witness, in which the member has a direct or personal interest, or in which the member has acted previously in an advisory capacity. A Committee member's eligibility to participate in a case may be challenged by the Dean or student or by other Committee members. All challenges must be exercised at least 5 business days before the hearing and will be ruled upon by the chair. Replacement Committee members will be named by the chair from the remaining panel members.
4. Five (5) members are necessary to conduct a hearing or take a vote. The chair will preside over a hearing, decide any evidentiary and procedural questions that arise, and inform the student in writing of the action taken by the Ad Hoc Disciplinary Committee.

5. The Dean of the Graduate School or their designee will be responsible for presenting the charges and the evidence to the Ad Hoc Disciplinary Committee. The individual who presents the case may question witnesses for both sides, will pursue other data or evidence requested by the Committee, and may make summary statements to the Committee. This individual will be present throughout the hearing; but will not be present once the Ad Hoc Disciplinary Committee begins its closed deliberations.
6. The student will be entitled to present evidence and witnesses, question the College's witnesses, and make statements to the Committee. The student will provide the chair of the Ad Hoc Disciplinary Committee with a list of witnesses and copies of any documentary or other evidence that will be presented, at least two (2) business days prior to the hearing.
7. The Committee may question the witnesses and make whatever other inquiries it deems appropriate. The hearing need not be conducted according to the rules of law or evidence, and the Committee may admit any evidence which is of probative value in determining the issues.
8. No one will be required to give self-incriminating evidence.
9. The student may be represented by legal counsel and/or accompanied by a faculty advisor of the student's choice, and the Dean and the Ad Hoc Disciplinary Committee may be represented by legal counsel, but legal counsel and or the advisor may not question witnesses.
10. The hearing will be closed except for members of the Committee, the student being reviewed, the Dean or designee and their staff, appropriate advisors for each of them, the person designated to record the hearing, and witnesses while they are testifying.
11. The Dean or their designee will have the burden to prove, by a preponderance of the evidence, that the student committed a professional misconduct violation. Only those matters presented at the hearing will be considered in determining whether the student committed professional misconduct, but the student's past record of conduct may be taken into account in determining disciplinary action.
12. If the student does not appear (personally or through counsel) without any satisfactory explanation for the absence having been made, or leaves the hearing before its conclusion, the hearing should proceed, and a decision should be rendered based on the available evidence just as though the student has been present throughout the hearing.
13. The Committee will make a record of the hearing, which may be an audio recording. A copy of the recording will be provided to the student at the student's request.
14. Following presentation of evidence, all other participants except the Committee's legal counsel will exit the hearing and the Committee will privately consider the evidence and reach a decision. A majority vote of the Committee members present shall be required for a binding decision. In the event that a student is found guilty of professional misconduct, the Committee will determine the appropriate sanction, which may range from reprimand to dismissal.
15. The student will be notified of the Committee's decision in writing by the chair of the Ad Hoc Disciplinary Committee, including a description of any sanction imposed, if applicable. If the student is found guilty, a copy of the committee chair's letter shall be placed in the student's academic file. If the student is found not guilty, no record will be placed in the permanent academic file.
 - a. Student can appeal any sanction that is not dismissal to the ASWC. Follow the Appeal of Sanction section.

16. Should the Committee find that dismissal from the Medical College of Wisconsin is warranted, the Committee will promptly prepare a written report which shall contain:
 - a. A brief summary of the facts found;
 - b. A finding that the facts found demonstrates that the student failed to meet the honest, ethical and responsible behavior of standards of the College.
 - c. A statement of the action that the Committee has decided to take and the effective date of the action. A copy of this report will be delivered promptly to the student, personally or by certified mail, return receipt requested.

The decision of the Committee will be treated as conclusive and binding, without right of appeal, unless the Committee decides that dismissal from the Medical College of Wisconsin is warranted. In that instance, the student may appeal the dismissal to the Dean of the Graduate School in accordance with the standard appeals mechanism as described in the dismissal appeals process below.

(Graduate Studies Council Approved June 21, 2024)

Appeal of Dismissal Policy

Appeal of Dismissal

A student may appeal the decision, of the Academic Standing and Welfare Committee (Academic Standing) or Ad-Hoc Committee (Professional Misconduct) and the Dean, to dismiss them from the College by giving notice, within ten (10) business days, in writing, of an intention to do so, specifying the grounds for the appeal. This notice must be delivered to the Graduate School Dean within ten (10) business days of the date on which the decision was made accessible to the student at a location specified by the student at the time of the hearing. A student who does not give such notice within ten (10) business days shall be deemed to have waived the right to appeal.

In the event of an appeal, the Dean will appoint, within five (5) business days of receipt of the notice of appeal, a subcommittee for the purpose of hearing the appeal of the student. The subcommittee will consist of five (5) members of the Graduate Studies Council. Members of the student's department or program and members of the Academic Standing and Welfare Committee are ineligible to serve on this subcommittee. An adequate number of alternate members will be designated to ensure that the hearing will be conducted by a full subcommittee.

The Ad-Hoc Appeals Subcommittee will set a date for hearing the appeal, which shall not be more than ten (10) business days after its appointment and shall give written notice of the time and place of the hearing to the student by personal delivery or by certified or registered mail.

At least three (3) business days prior to the appeal hearing, a written report giving the decision of the Academic Standing and Welfare Committee (Academic Standing) or the Ad-Hoc Committee (Professional Misconduct) and the summary of the hearing conducted by that Committee shall be delivered to the Appeals Subcommittee.

At least three (3) business days prior to the appeal hearing, the student, or their representative shall submit to the chair of the Appeals Subcommittee a written statement detailing the grounds on which the appeal is based.

The chair of the Appeals Subcommittee will distribute a copy of both these documents to members of the Subcommittee at least two (2) business days prior to the appeal hearing.

This Appeals Subcommittee will conduct the review hearing subject to the following:

9. In reviewing the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee, this Appeals Subcommittee will be confined to the decision of the Committee and the process whereby this decision was reached. Except as provided in paragraph "4" below, no new testimony will be taken. This Subcommittee may affirm the Academic Standing and Welfare Committee's decision, or may modify, or reverse it, if the substantial rights of the student have been prejudiced by reason of the Committee's decision being:
 - a. An unfair or incorrect application of the policies of the College concerning student performance
 - b. Arbitrary and capricious
10. Inconsequential irregularities in the deliberations procedure of the Academic Standing and Welfare Committee shall not be grounds for reversal of the Committee's decision. The test is whether the deliberations conformed to MCW guidelines, and whether the student's rights were compromised by such irregularity.
11. Hearings before this Appeals Subcommittee are not public. Members of the Appeals Subcommittee, the student, the student's advisor or counsel, a representative of the Academic Standing and Welfare Committee, and the person designated to record the hearing, if any, may be present. The hearing will be recorded upon the order of the chair of this Appeals Subcommittee.
12. The student and the student's legal counsel, and/or a single advocate may appeal for modification or reversal of the Committee's decision. A representative of the Committee, or its counsel, may appear and present a statement explaining the basis for the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee. Members of this Appeals Subcommittee may question those present on pertinent matters.
13. Following the presentations and questioning, all other participants shall privately consider the matter. A majority vote of the Subcommittee members present is required for a binding decision.
14. With reasonable promptness, a written report stating the conclusion and underlying reasons affirming or reversing or modifying the decision of the Academic Standing and Welfare Committee or Ad-Hoc Committee will be prepared. This Appeals Subcommittee shall state its conclusion and the underlying reasons therefore.
15. A copy of the decision shall be delivered, with reasonable promptness, to each of the following:
 - a. The student: in person, by email, or by certified or registered mail, return or read receipt requested;
 - b. The Academic Standing and Welfare Committee or the Ad-Hoc Committee
 - c. The School of Graduate Studies Dean
16. The decision of this Appeals Subcommittee shall be final and non-appealable.

(Graduate Studies Council Approved June 21, 2024)

Substance Abuse

Please reference the [MCW All-Student Bulletin](#).

Service Animal

Please reference the [MCW All-Student Bulletin](#).

Sick Leave for Stipend Students

Graduate students on a stipend accrue a limited amount of sick leave. The sick time must be recorded on the timesheet. If the sick leave exceeds the amount of accrued sick leave, students must record vacation time if they are away from work due to illness. A student and their mentor or Program Director may, however, jointly decide not to record the absence as vacation time if the time away has been or will be made up through additional effort on other days. Notwithstanding the foregoing, if a student is away from work for more than three (3) consecutive days due to illness or injury, he or she should contact the Director of Enrollment in the Graduate School to determine if they qualify for Family Medical Leave.

Stipends

It is the policy of the School of Graduate Studies and the Graduate Studies Council that: (1) All eligible full-time PhD degree candidates in good academic standing receive a graduate stipend and (2) that within each program, the stipend level should be uniform among all eligible students at a comparable level of training. It is the goal of the School of Graduate Studies that all eligible students are compensated equitably.

Stipends for doctoral program graduate students are set as follows:

- The School of Graduate Studies monitors stipend levels nationally, particularly at peer schools.
- The Graduate Studies Council makes a recommendation to the Dean of the School of Graduate Studies regarding any changes in stipend level
- The decision of the Graduate Studies Council is submitted by the Dean to the MCW Budget Committee and Provost.

All full-time PhD degree seekers must be continuously enrolled full-time in order to receive their stipend.

Student Called to Military Service

Please reference the [MCW All-Student Bulletin](#). Students who are called to military service should immediately notify the Graduate School (gradschool@mcw.edu).

Tuition & Fees

Students are responsible for paying tuition according to [established deadlines and procedures](#). All students can view their accounts and make payments online in MCWconnect.

Students who are full-time employees at MCW must pay their tuition at the time of registration. Employees should contact the MCW Benefits Office to initiate tuition reimbursement under the benefits plan.

Payment of tuition is not required under the following stipulations:

- Marquette University and University of Wisconsin-Milwaukee students covered by the tuition reciprocity agreement.

- Student receiving MCW Graduate School scholarships in the amount of the tuition due.
- Students receiving departmental scholarships in the amount equal to or greater than the tuition due. However, documentation must be received by the Office of Student Accounts by the end of the registration period or a late fee will apply.
- Students who have applied for loans through the MCW Student Financial Services Office in an amount equal to or greater than the tuition due.

Late Fees apply as follows:

- \$250 Late Payment Fee if payment for registration is not received by the Office of Student Accounts as scheduled per the tuition policy.

Tuition Payments

A student who has submitted a completed application for loans through the MCW Financial Aid Office in an amount equal to or greater than the tuition and fees due is not required to pay tuition until the funds have been made available to them. Deferral of tuition and fees payment as described herein is contingent on the student completing all required paperwork for the loan in an accurate and timely manner. Students should consult the [MCW Financial Aid Office](#) for procedures and deadlines.

Any difference between the amount of the loan application and the tuition and fees due must be paid according to the tuition policy.

All students receiving loan assistance must participate in an exit interview. A hold will be placed on the student's academic record and he/she will not be allowed to graduate if the exit interview is not completed.

Non-Payment of Tuition or Fees

If full payment of tuition and fees, including late fees, is not made within thirty (30) calendar days from the due date, the MCW Graduate School shall withdraw the non-paying student from all course registrations.

A student shall receive no academic credit for classes in which the student was enrolled during a period for which tuition and fees were not paid in full.

Refund Policy

If students withdraw or are dismissed, tuition will be refunded based upon the amount of tuition due less the percentage of days enrolled, up until the time Federal Regulations determine tuition has been fully earned via the Return of Title IV process (R2T4). With the exception of health, dental, vision, and life/disability insurance, all fees are non-refundable. After the R2T4 process determines tuition has been fully earned, no refund will be issued. Insurance is refunded based on the number of months the student is enrolled in coverage regardless of the R2T4 determination.

If refunds are due to students who received financial aid during the current payment period, the amount of the refunds will normally be returned to the financial aid program(s) first according to Federal Regulations. Students who received institutional scholarships will retain, for past and current terms only, the disbursed scholarships upon dismissal or temporary or permanent withdrawal. In the event an overpayment still exists, any remaining funds will be refunded.

Tuition Reimbursement for Staff

The MCW Staff Reimbursement Policy can be found [here](#).

(Corporate Compliance HR.BN.140; Approved August 1, 2023)

Vacation Policy

Full-time graduate students who are receiving stipends are allowed ten (10) days of vacation per academic year (July 1 to June 30). Vacation days may be used only during the year in which they are accrued; unused vacation days do not carry over to the following year. Additional vacation time may be awarded by the student's designated mentor, subject to review by the Program Director. Use of vacation days after a student has finished their graduation requirements is at the discretion of the student's mentor. Days between the end of one term and the beginning of the next are part of the academic year, and students are expected to be present unless they are using their vacation days. Holidays designated by the Medical College of Wisconsin are separate from vacation days.

Students should discuss their vacation plans with their mentor at least four (4) weeks prior to the vacation. If a student does not yet have a mentor, they should discuss their vacation plans with their Program Director. Vacations cannot be taken unless approved in advance by the student's mentor or by the Program Director if a mentor has not yet been selected. Such approval should not be withheld unless the time away will seriously compromise the student's productivity or academic progress. It is strongly recommended that students enrolled in classes not take vacation time while their classes are in session. If a student is planning to be away during classes, they should check with the Course Director to determine the policy for absences from that course. In general, personal travel is not an acceptable excuse for missing examinations or assignments.

Students should record use of vacation time on their monthly time sheets. The Graduate School will keep track of vacation days used by students during the time their stipend is paid by the Graduate School. Thereafter it is the responsibility of the student's Graduate Program to monitor the use of vacation days. A student and their mentor (or Program Director if a mentor is not yet selected) may jointly decide not to record an absence as vacation time if the time away has been or will be made up through additional effort on other days.

International students who wish to use vacation days for travel outside of the United States should contact internationalstudent@mcw.edu.

(Graduate Studies Council Approved February 2, 2009; Reviewed June 26, 2024)

Section 5: Faculty Information

Credit Calculations

Graduate course credit is calculated according to the following mechanism:

- Each 18 hours of lecture, reading course presentations and other online materials, incorporating instructor feedback, engaging in online discussions/dialogue, interactive tutorials, or computer-assisted instruction and assessments = one (1) credit hour
- Each 36 hours of laboratory, conference, demonstrations, clinical conference, other course activities = one (1) credit hour

- Ninety (90) non-contact credit hours conducting research, writing papers or other assignments, completing projects, = one (1) credit hour*

(Graduate Studies Council Approved December 9, 1996; Reviewed June 26, 2024)

Virtual Courses

Definition: A virtual course is any course in which student may complete more than 50% of the requirements through internet access to the course web site.

Equivalence: Courses taught in the virtual format must be equivalent to the same course(s) taught in the traditional, face to face format.

During the planning and development of an asynchronous course, faculty should estimate the time a typical student will take interacting with the course content not limited to reading course presentations and other materials, participation in online discussions, conducting research, writing papers or other assignments; taking exams, interactive tutorials, or computer-assisted instruction; engagement with the instructor regarding course content, and completing other assignments or projects. The total time spent on these activities in an online course is equivalent to time spent on comparable activities in a face-to-face, traditional course.

As is the case with traditional, face to face courses, virtual course syllabi should provide evidence of compliance with the "Course Credit Calculations" (see above).

(Graduate Studies Council Approved August, 11 1982; Reviewed June 26, 2024)

Faculty Tools

Turnitin

The Graduate School offers a plagiarism detection tool through Turnitin and can be added to a class assignment in Brightspace by faculty in an instructor role for classes in Brightspace. A guide can be found [here](#).

Syllabus Information

Course syllabus requirements can be [found here](#).

Graduate Studies Council

The members of the Graduate Studies Council (GSC) consist of MCW's Program Directors and Recruitment Directors from each of the Graduate School programs, the President and Vice President of the Graduate Student Association, the Dean of the Graduate School and other members appointed by the Dean. Membership terms are determined by the length of time the member(s) remain in the position they currently hold (i.e., as program or recruitment director, as President and Vice President of the GSA, etc.)

Terms are determined by the length of time the member(s) remain in the position they currently hold i.e.: as program or recruitment director, as President and Vice President of the GSA, etc.

Academic & Standing Welfare Committee

The committee shall make recommendations to the Graduate Studies Council on matters concerning student welfare and shall guide students on academic probation. The committee shall normally be comprised of three (3) faculty members elected by the Graduate Faculty (3-year terms), two (2) faculty members appointed by the Dean of the Graduate School (3-year terms), and graduate student member identified by the Graduate Student Association (1 year term).

Awards Committee

The committee shall review all student applications for travel awards to scientific meetings and award monies as funded by the Friends of MCW and the Graduate Student Travel Fundraiser. The committee shall also review and award monies for poster submissions at the Annual Research Day. The committee shall be comprised of three (3) faculty members elected by the Graduate Faculty (3-year terms), three (3) faculty members appointed by the Dean of the Graduate School (3-year terms), and one graduate student identified by the Graduate Student Association (1 year term).

Curriculum and Programs Committee

The committee shall review all courses and programs, including certificate programs, proposed as new offerings of the Graduate School. The committee shall recommend to the Graduate Studies Council acceptance, modification, or rejection of the proposed courses and/or programs. Approval by the committee shall be the first step toward accreditation of new programs. The committee shall be comprised of three (3) faculty members elected by the Graduate Faculty (3-year terms), three (3) faculty members appointed by the Dean of the Graduate School (3-year terms), and one graduate student identified by the Graduate Student Association (1 year term).

Course Evaluation Committee

The committee shall review course evaluations completed by the students at the end of each term. The committee will be comprised of four (4) faculty members elected by the Graduate Faculty (3-year terms), three (3) faculty members appointed by the Dean of the Graduate School (3-year terms), and one graduate student identified by the Graduate Student Association (1-year term).

Evaluations

For information pertinent to annual course and faculty evaluations, please click [here](#).

Course Evaluation Syllabus Statement

Course Directors are requested to place the following statement on the syllabus of any course for which course evaluations are required:

"Course Evaluations: All students completing the course for credit are required to complete an online Course Evaluation on OASIS by the end of the course. Participation by all students is important for the Graduate School's course evaluation process and for our continued accreditation. The Graduate School will provide instructions on how to complete the evaluation and you will have until 2 weeks after the end of the course to complete the evaluation. Students who fail to complete the evaluation are no longer in good standing. The Graduate School will not provide transcripts, confirm enrollment, allow enrollment in additional courses, allow graduation, or support payment of stipends for students who are not in good standing. In addition, the Graduate School may impose a \$100 fine for each course evaluation not completed on time."

Continuous Quality Improvement

The current course director will be responsible for generating the triennial report, using data provided by the Graduate School. After submitting the triennial report to the Graduate School, the course evaluation committee (CEC) will review the report and provide a summary statement that will be included in the final report.

It is the responsibility of the Course Director and Program Director to maintain and, where necessary, improve the quality of Graduate School courses. If deficiencies are due to factors beyond the Course Director's control, the Program Director and the Dean and staff of the Graduate School will use their best efforts to help the Course Director make the changes necessary to improve the course.

(Graduate Studies Council Approved January 5, 2009; Reviewed June 26, 2024)

Program Evaluation Committee

The committee shall review appropriate criteria and metrics and shall periodically evaluate all programs of the Graduate School. The Chair of the committee will report the results of each review to the Dean of the Graduate School and to the Graduate Studies Council. The committee will be comprised of three (3) faculty members elected by the Graduate Faculty (3-year terms), three (3) faculty members appointed by the Dean of the Graduate School (3-year terms), and one graduate student identified by the Graduate Student Association (1-year term).

Program Evaluations

Graduate Program Review Guidelines

Each degree program of the School of Graduate Studies is subject to quality review at intervals not to exceed 5 years and more frequently if needed. The review process consists of the following steps:

1. Program self-study conducted by program faculty, students and alumni
2. Review conducted by the GSC Program Evaluation Committee with recommendations from the Dean of the Graduate School and the Program Evaluation Committee

The purpose of the review process is to ensure that:

- Program missions and objectives are being met.
- Student admission standards are satisfied.
- Entering students are provided adequate orientation and direction.
- Program has enough students and faculty to provide collegial interactions.
- Students master their chosen discipline.
- Students engage in meaningful research.
- Students have an understanding of faculty expectations.
- Student progress is regularly monitored.
- Students have the opportunity to succeed in their chosen program.
- Students have access to rewarding positions upon graduation.
- Students are treated fairly and equitably.
- Program has national stature.

Records of the review process, including program responses to review concerns, are maintained in the host department or institute and in the Graduate School.

Graduate School Rank Committee

The GSRC serves a dual role, as the official Rank committee of the Graduate School, under the aegis of the University Rank and Tenure Committee and ultimately the MCW Faculty Council, and as the Graduate School Faculty Credentialing Committee, as a sub-committee of the Graduate Studies Council. The chair of this committee serves as a member of the University Rank and Tenure Committee. The committee shall be responsible for developing and maintaining a Standard Operating Procedure (SOP) that details how the GSRC will interpret MCW policies regarding faculty appointment and promotion criteria, for review and maintenance of the Graduate School credentialing policy, for reviewing applications for promotion in rank for Graduate School appointed faculty and determination of the appropriate credentialing category for appropriate Graduate School faculty members and reviewing such credentials on a 5-year basis. The Chair of the committee will report the results of the committee's deliberations to the Dean of the Graduate School. The committee will be comprised of three (3) faculty members elected by the Graduate Faculty (3-year terms), and two (2) faculty members appointed by the Dean of the Graduate School (3-year terms). **(Note: Service on this committee is restricted to Associate and Full Professors).**

Graduate School Faculty Membership

There are three categories of Graduate School Faculty credentials:

- 1) Member, Graduate School Faculty,
- 2) Member, Graduate School Faculty and Qualified Primary Thesis Mentor,
- 3) Member, Graduate School Faculty and Qualified Primary Dissertation Mentor.
- 4) Member, Graduate School Faculty and Qualified Primary Professional Dissertation Mentor (DrPH Only)

Membership is required to direct courses, to act as primary mentor for graduate students, and to serve on graduate school administrative committees. Appointment as either Qualified Primary Thesis Mentor (QPTM), Qualified Primary Professional Dissertation Mentor (QPPDM) or Qualified Primary Dissertation Mentor (QPDM) is additionally required to act as primary mentor for Master's and doctoral students, respectively. Membership is not required to teach graduate courses or serve on thesis and dissertation committees, but is required to direct a course and serve as a primary mentor. Graduate School Faculty Membership is contingent upon the faculty member being accepted into an existing graduate program. The application for Graduate School faculty membership should be coordinated with the Graduate School who can be contacted at gradschool@mcw.edu. Individual programs may have specific criteria. Please contact the Program Director in the appropriate program prior to submitting the application to the Graduate School.

Application to the Graduate School for faculty membership minimally requires:

(i) A letter:

- That indicates the category (Member, QPTM, QPPDM, or QPDM) and graduate program for which appointment is sought;
- That summarizes the applicant's teaching and mentoring experience;
- That describes the qualifications of the applicant to teach and, where applicable, mentor graduate students in the relevant program. For faculty who have had limited prior teaching and/or mentoring experience, the Director of the affiliated graduate program should describe procedures to ensure that the faculty applicant will be able

to serve as a competent mentor and/or course director. This may include establishment of a mentoring committee, co-mentoring of graduate students, inclusion of co-directors for courses, etc. If the program has an established mentoring plan for new faculty, a copy of the plan should be forwarded with the application

- That is co-signed by the applicant, the applicant's primary Department Chair and the Graduate Program Director. Where considered appropriate, the additional endorsement of a secondary department Chair may be requested.

(ii) A curriculum vitae, in MCW or equivalent format, that includes descriptions of:

- Educational and employment history;
- Research activity and funding;
- Publications;
- Teaching and mentoring experience;
- Committee and other service

(iii) Credentialing summary form

Appointment as QPTM, QPPDM, or QPDM requires:

- Appointment as a Member of the Graduate Faculty.
- Evidence that the applicant can provide an academically active environment for graduate student training. Evidence may include peer-reviewed publications, competitive research awards, and participation in the conceptualization, design and execution of funded research.
- That any previously mentored graduate students completed training in a successful and timely manner.
- That the applicant has participated in the activities of the graduate program to the satisfaction of the Program Director, and is supported in the application by the Chair of their primary department.

In the event that a graduate student mentor loses their QPTM, QPPDM, or QPDM status, then the Dean of the Graduate School will confer with the Program Director and the student's departmental Chair, to determine whether a change of mentor will best serve the student or be detrimental. If a change of mentor is advised, the Program Director will be charged with identifying an alternative mentor. If a change of mentor is not deemed in the student's best interest, then the student's mentor will continue as Primary Mentor until graduation but will otherwise relinquish all other privileges associated with QPTM, QPPDM, or QPDM status until re-appointed.

For all Appointments:

It is expected that established graduate school faculty should have demonstrated a history of commitment to teaching and, where appropriate, mentoring graduate students. Adjunct faculty and applicants who are not appointed to a School of Graduate Studies department or otherwise lack graduate school teaching or mentoring experience commensurate with the appointment sought may substitute related activities, such as medical school teaching. Their appointment will be expected to be justified and strongly supported by the Graduate Program Director. Adjunct faculty must additionally submit the letter of support for their appointment to MCW from their Department Chair or Institute Director that identifies the MCW core missions to which the individual is expected to contribute, [as described the Information for Faculty Handbook](#).

Applications should be sent to the Graduate School for initial review and will then be submitted by School of Graduate Studies to the Graduate School Rank Committee (GSRC) for approval or rejection. Information about applicants to the Graduate School Faculty may be solicited by the GSRC from other sources, e.g., Course directors or the Graduate School. A full application is required for all new applicants and from applicants requesting a change in category (from Member to QPTM, QPPDM, or QPDM and from QPTM to QPDM). Graduate faculty who has current membership as a QPTM, QPPDM, or QPDM and are requesting membership to (an) additional graduate program(s) should send a request letter co-signed by the Program Director and Chair from the Department with which membership is being requested. The GSRC will review applications as needed and will make recommendations to the Dean of the Graduate School. The Dean will make the final decision and will convey the final decision to the applicant, the Program Director, the Department Chair and Department Administrator. Unsuccessful applicants may re-apply via the GSRC at any time or appeal the decision directly to the Dean.

Appointment covers the period between graduate program reviews, and reappointment requires review by the GSRC as a component of the 5-year program review. Program Directors will be requested to submit a list of faculties requesting reappointment along with their CVs to the GSRC at the beginning of the program review process. Reappointment at the same level for the same program does not require a letter of support.

(Graduate Studies Council Approved June 2, 2014; Revised April 2, 2018)

Required Courses Approvals

Process for New Courses

All Graduate School courses must be approved by the Graduate Studies Council after evaluation by the Curriculum and Programs committee. New course proposals must be submitted using the [New Course Proposal Form](#). These proposals are administratively reviewed by the Graduate School and, if complete, forwarded to the Curriculum and Programs Committee for evaluation. This evaluation may result in one of the following outcomes: approval, approval with changes, or disapproval. The Committee's recommendation will then be discussed and acted upon by the Graduate Studies Council. Not infrequently, the course or program director is interviewed by the Council as part of the review process.

Questions regarding the new course process can be sent to gradcurriculum@mcw.edu.

(Graduate Studies Council Approved June 26, 2024)

Process for Substantial Course Changes

If a department or program wishes to change any information in a course's description (title, number of credit hours, prerequisites, or substantial changes in content), they must complete the [Substantial Change to Course Form](#). Substantive changes are referred to the Curriculum and Programs Committee, which reviews the proposed changes. This evaluation concludes in a recommendation for approval, approval with changes, or disapproval.

Required Program Approvals

New programs require approval at both the Graduate School and Institutional level. Institutional approval is mainly concerned with the business aspects of a new program, including financial and resource impact. The program proposal is assessed by the Health Science University (HSU) committee

before being recommended for approval by the Assessment Oversight Committee (AOC). [Resources for new academic programs can be found here.](#)

Graduate School-level approval is mainly concerned with the academic need and administrative organization of the program. A proposal for a new degree-granting program should include, but need not be limited to, the following information:

- Statement of sponsorship from the department chair or the course director, and where appropriate, of the department chair or other participating faculty. This statement will verify the commitment of the department(s) of faculty time, facilities, and necessary financial support.
- A description of the nature and significance of the program.
- An indication of why it is appropriate and desirable for MCW to add this program to the academic offerings of the Graduate School.
- An indication of how the proposed program will complement and relate to existing graduate programs at MCW.
- A description of the resources available to support this program (i.e., space, equipment, funds, teaching faculty).
- Regarding the potential student population, a description of:
 - The sources of students.
 - The academic qualifications of these students.
 - Why these students would be attracted to this program at MCW.
- Regarding administrative procedures and requirements:
 - Describe any variations from the usual Graduate School application process as described in the Graduate School bulletin.
 - Specify the process within the department or institute for administration of the program.
 - Identify the criteria to be used in accepting and in rejecting applicants.
 - Describe the academic prerequisites for admission.
- Regarding the curriculum of the program, describe:
 - Required courses (list of courses by name);
 - Elective courses (list of courses by name);
 - Provide 1 or more sample program plan(s) which show the expected sequence of courses during the program of study.
- For qualifying, comprehensive, and other types of exams, indicate:
 - When a student would be expected to take each type of exam.
 - Who will coordinate the preparation and evaluation of the exam?
 - General characteristics of the exam.
 - Criteria to be used in evaluating the exam.
- Provide a detailed description of all new courses which are proposed. Refer to the "Guidelines for Proposing New Courses" for a description of the information requested.

If instruction is to occur by any method other than classical lecture technique, then, for each course:

- A) Describe the method of instruction.
- B) Describe any special equipment which will be required.
- C) Discuss the arrangements which have been made for use of the equipment.
- D) (Hours/week, financial details, etc.)

- Describe the research or project opportunities in the program. Each participating member of the faculty should provide a complete Curriculum Vitae, plus supplementary information where needed to include:
 - Funded research by project title, duration of the funding, and amount of current funding.
 - Specific research opportunities for students in this program.
 - Describe planned mechanism for periodic evaluation of each student's research progress in the program.
- Describe the Graduate Committee which will be formed to direct the student's program, including:
 - How and when the Committee will be formed.
 - The composition of the Committee.
 - How the student's research advisor/primary mentor will be chosen or selected.
- Provide evidence that the eligible, participating faculty have experience in graduate education such that the teaching and research objectives of the program can be met.
- Indicate in detail the anticipated number of faculty hours of effort in each component of the program and explain how the faculty will meet this time commitment.
- Clarify further any unusual aspects of the program.

(Graduate Studies Council Approved June 26, 2024)

Program Changes

To substantially change a program (i.e. credits, curriculum changes, etc.), programs must submit a letter detailing the rationale behind these changes and what these changes are. The letter must be signed/sent from the program director.

Substantive changes are referred to the Curriculum and Programs Committee, which reviews the proposed changes. This evaluation concludes in a recommendation for approval, approval with changes, or disapproval.

New Certificate Program

Certificate Programs are designed to recognize successful completion of predefined coursework in a focused area of study. Completion of a minimum of 12 graduate credits of coursework is required as defined by each Certificate Program. Upon successful completion of the Certificate Program requirements, the Graduate School will issue a Certificate to the student and will record completion of the program on the student's transcript. Certificate Program Proposal Template:

- Statement of sponsorship from the department chair or the course director, and where appropriate, of the department chair or other participating faculty. This statement will verify the commitment of the department(s) of faculty time, facilities and necessary financial support.
- Name of proposed Graduate Certificate Program (not to exceed 18 characters)
- Name of the sponsoring Program and Department or Institute
- Program Director's name
- Identify the specific focus of the Certificate Program and provide a brief description.
- Indicate why it is appropriate and desirable for the MCW to offer this Certificate Program. Please include any available data supporting the need for the Program, interest in the Program,

and evidence of competing programs. Describe what, if anything, sets the proposed MCW Program apart from those offered elsewhere.

- How will the proposed Certificate Program complement and relate to existing graduate programs at MCW?
- What are the anticipated sources for student recruitment? Describe the academic qualifications required of students. What is the anticipated enrollment? Identify the prerequisites for admission into the program, above and beyond those imposed by the Graduate School.
- Identify courses, and /or seminars to be included in the required program of studies. For existing approved courses, list by course name and number. Show the expected Course sequence and the general timeframe in which each course will be offered. Note that new course proposals are considered through the GSC approval process, regardless of their inclusion in a proposed or approved certificate program.
- Provide a general description of the resources available to support the program. List supporting faculty members including a brief description of their expertise relating to the graduate certificate. Discuss the effect of offering the Certificate Program and any new courses on the faculty workload. Identify supplies or other resources needed to support the Program (e.g., space, equipment, and funds).
- Describe the relationship of the proposed certificate program to the strategic plans of the department, the Graduate School and MCW.
- What is the anticipated revenue stream? Please meet with the Graduate School to discuss funding of its efforts to register, monitor and graduate students.
- Provide a plan for periodic program assessment. What are the metrics by which student and program success will be measured?

Please submit the information requested above to the Graduate School Office along with a cover letter containing the signatures of all participating faculty so that there is certainty that all participants are fully informed concerning the material being submitted. The proposal will be evaluated by the Graduate School Curriculum and Programs Committee. That Committee may request additional information or revisions to assure the quality and appropriateness of the course. Once approved by the Committee, the Chair of the Committee will bring the course to the next regularly scheduled meeting of the Graduate Studies Council for consideration and approval

(Graduate Studies Council Approved, June 26, 2024)

Changes

To substantially change a program (i.e. credits, curriculum changes, etc.), programs must submit a letter detailing the rationale behind these changes and what these changes are. The letter must be signed/sent from the program director.

Substantive changes are referred to the Curriculum and Programs Committee, which reviews the proposed changes. This evaluation concludes in a recommendation for approval, approval with changes, or disapproval.
